LESSON 4: WARMUP MISTAKES THAT GET YOU BANNED

Most account bans happen during the warmup phase because people cannot resist skipping steps. This lesson covers every common mistake and why each one triggers platform flags. Study these carefully — every mistake listed here is one that real operators have lost accounts to.

Mistakes That Kill Accounts

- Posting content on Day 1 (the platform has no trust in you yet)
- Adding a link in bio during warmup (screams promotional account)
- Following 50+ accounts per day (bot behavior trigger)
- Liking hundreds of posts in a session (automated pattern detection)
- Using the same caption style on every post (template detection)
- Posting suggestive content before the account has trust built
- Using banned or spammy hashtags during warmup
- Copy-pasting captions (platforms detect identical text patterns)
- Using third-party automation tools that require account login
- Switching between multiple accounts rapidly on the same device

What Winners Do Instead

- Wait 3-5 days before first post on any platform
- Keep all warmup content clean, casual, and unremarkable
- Engage like a real user: varied comments, natural timing, genuine interest
- Add link in bio only after Week 3 when engagement is stable
- Keep follow/unfollow activity low and spaced throughout the day
- Post slowly and increase frequency gradually over weeks
- Let the algorithm come to you — do not force it
- Type every caption and comment manually — never copy-paste

GOOD EXAMPLE:

Week 1: Scroll, like 10-15 posts, follow 5 accounts. No posts.
Week 2: First carousel, 2 stories. Light commenting.
Week 3: 3 carousels, daily stories, start Threads.
Week 4: Add link in bio, start Reels.

Result: Healthy account with organic growth signals.

BAD EXAMPLE:

Day 1: 5 posts, 100 follows, link in bio, hashtag spam.
Day 2: Suggestive content, 200 likes in one session.
Day 3: 'Why isn't my account growing?'
Day 5: Shadowbanned. Account is effectively dead.

Result: Wasted time, wasted content, start over from scratch.

Instagram-Specific Rate Limits

Instagram has invisible rate limits. Exceeding these triggers automatic flags even on established accounts. During warmup, stay well below these numbers.

- Maximum 150 likes per hour (stay under 50 during warmup)
- Maximum 60 comments per hour (stay under 10 during warmup)
- Maximum 60 follows/unfollows per hour (stay under 10 during warmup)
- These limits are per hour, not per session — pace yourself throughout the day

> **THE INVISIBLE FLAG**
>
> You will NOT get a warning. Platforms silently reduce your reach. You will not know you are shadowbanned until weeks later when nothing grows. Prevention is the only cure. There is no undo button.

The Patience Test

The warmup phase is a filter. The operators who succeed are the ones who can sit through 3-4 weeks of boring, slow, deliberate activity without breaking protocol. If you cannot handle the boredom of warmup, you will not handle the grind of growth. This phase tests your discipline more than your skills.

> **RECOVERY COST**
>
> If you rush warmup and get banned: you lose all content posted, all followers gained, all warmup time invested, and you must start over with a new device, new SIM, new IP, new account. The cost of impatience is measured in weeks, not minutes.

END SUMMARY

- One dedicated phone per persona — never share devices or IP addresses between personas
- Use residential or mobile proxies for best safety — datacenter VPNs are workable but riskier
- Antidetect browsers (GoLogin) and cloud phones (GeeLark) are for scaling beyond your first persona — not needed to start
- Usernames must be human-sounding, memorable, and consistent across all platforms
- No links, no selling language, and no suggestive content during warmup — period
- Instagram warmup: 21-28 days. TikTok: 9 days. Twitter/X: 14 days. No shortcuts exist
- Stay well below platform rate limits during warmup: under 50 likes/hour, under 10 follows/hour on Instagram
- Behave like a real person: scroll, like, comment naturally before posting content
- Most bans happen during warmup because people rush — patience is mandatory and non-negotiable
