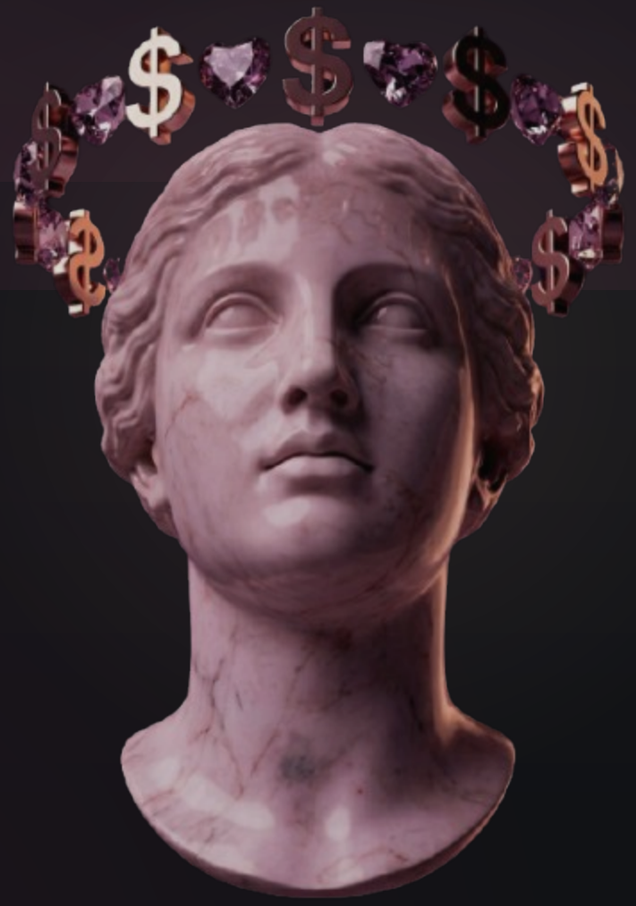
LESSON 4

Multi-Account Safety Rules

Learn How to Protect Your Social Media Accounts from Bans and What to Do if It Happens

AI INFLUENCER METHOD



LESSON 4: MULTI-ACCOUNT SAFETY RULES

Running multiple accounts is the highest-risk activity in this business. Platforms are designed to detect multi-account operations. One mistake can cascade and take down all your accounts simultaneously. These rules are absolute.

Device Separation (Non-Negotiable)

- One phone per persona (ideal)
- Max 2 accounts per device (absolute maximum)
- TikTok: max 3 accounts per device
- Never log into two personas in the same app session
- Never switch between accounts rapidly
- Factory reset devices between personas if reusing hardware

IP & Network Separation

- Each persona should use a different IP address
- Use mobile data (different SIM) or separate VPN profiles
- Never access two personas from the same WiFi network simultaneously
- Keep VPN locations consistent per persona — don't jump around

Identity Separation

- Each persona gets a unique email address
- Each persona gets a unique phone number
- Never cross-follow between your own accounts
- Never share links between your own accounts
- Never mention one persona from another
- Different content niches and posting schedules

What Gets Multi-Accounts Caught

- Same IP address across accounts
- Same device fingerprint
- Cross-following between your own accounts
- Identical posting patterns (same times, same hashtags)
- Shared link in bio URLs
- Logging into multiple accounts from one device in rapid succession

NUCLEAR RULE

If one account gets banned, do NOT access your other accounts from the same device or IP for at least 72 hours. A ban investigation can cascade to linked accounts. Quarantine immediately.
