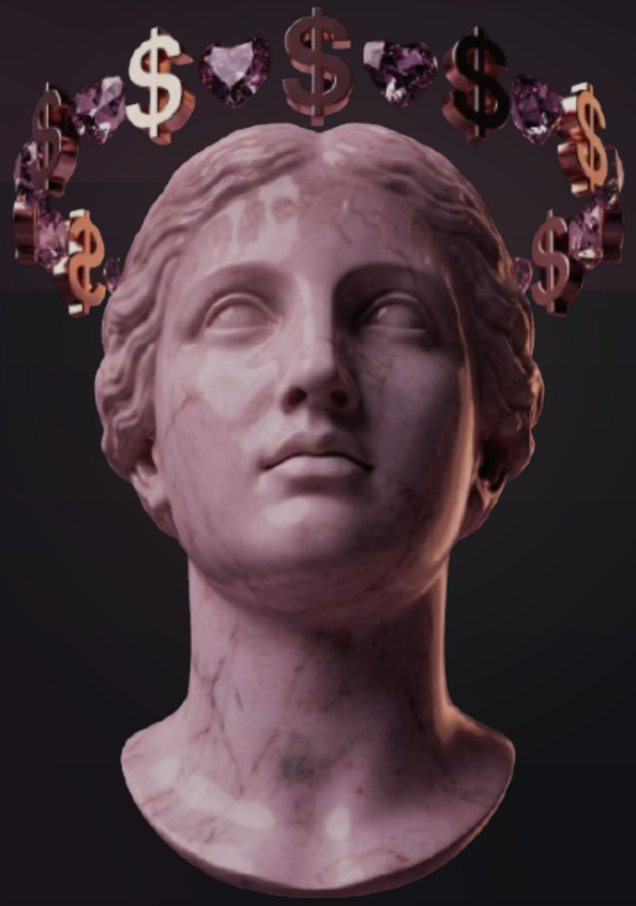
MODULE 3
LESSON 1

Reference Image Workflow

Learn How to Generate SFW Images from Reference Images

AI INFLUENCER METHOD



LESSON 1: REFERENCE IMAGE WORKFLOW

Once you have your base model from Module 2, every new image you create should be generated using that base as a reference. This is how you maintain consistency across hundreds of images. The reference image workflow is the backbone of your content pipeline.

The Reference Workflow

- → Start with your locked-in seed image from Module 2
- → Upload it as a reference/input image in your generation tool
- → Write a new prompt describing the desired scene, outfit, or setting
- → Generate multiple outputs and compare against the reference
- → Only keep images that match the face consistently

Step-by-step screenshot of uploading reference image and generating a new variation

Reference Image Best Practices

- Use a clear, front-facing headshot as your primary reference
- Keep 2-3 reference angles (front, 3/4 turn, profile) for variety
- Higher resolution reference = better consistency in outputs
- Never change your reference image once your page is live
