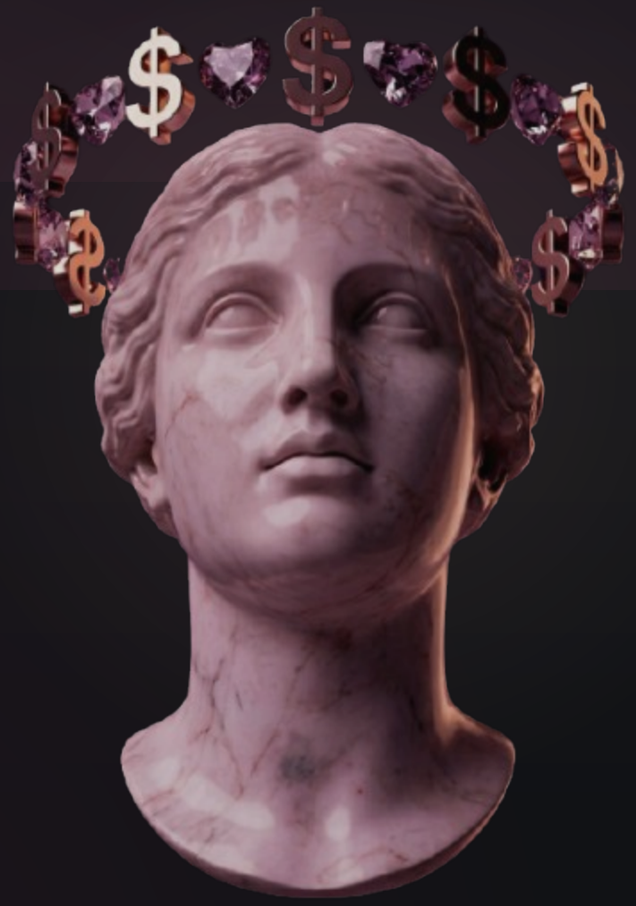
MODULE 5
LESSON 2

Creating & Configuring Accounts

Setup for Your Phone and Warmup for Your Social Media Accounts

AI INFLUENCER METHOD



LESSON 2: CREATING & CONFIGURING ACCOUNTS

Account creation is not just signing up. Every decision you make in the first 24 hours sends signals to the platform's algorithm. This lesson covers how to create accounts that look human from the very first second.

Username Rules

- Human-sounding name — first name or first name + initial
- No random numbers (e.g., emma38472)
- No sexual or suggestive words
- Easy to remember and search
- Same username across all platforms for this persona

GOOD EXAMPLE:

Username: emma.laine / lilyy.rose / sofiamrr
Real-sounding, memorable, no red flags.

BAD EXAMPLE:

Username: hotgirl_2024 / xXsexyEmmaXx / model.promo.page
Instant red flags for platforms and audiences.

Profile Setup (First 24 Hours)

- Add a profile photo (clear face shot of your AI model)
- Write a short, casual bio — personality-driven, not salesy
- No links in bio during warmup — add after 3+ weeks
- No selling language, no emojis spam
- Set account to public

Bio Examples

GOOD EXAMPLE:

Bio: '22 ☀️ dreaming in california'
Simple, human, personality-driven.

BAD EXAMPLE:

Bio: '🔥 DM for exclusive content 🔥 Link below 👇'
Screams promotional account. Will get flagged.

TIKTOK EXCEPTION

On TikTok, do NOT add username, bio, or profile picture immediately after account creation. Close the app for 20 minutes after creating the account. Then come back and add details slowly over the first 2-3 days.
