FOREWORD: FUNNEL PSYCHOLOGY

The endpoint is Fanvue. Every other platform exists to support that conversion.

Instagram is not a selling platform. Instagram is a distribution engine. The mistake beginners make is attempting to convert users too early, too directly, or too aggressively without warming intent.

Purpose of This Funnel

- Capture attention
- Reduce friction
- Delay commitment
- Increase urgency
- Force monetization at the correct endpoint

FUNNEL OVERVIEW: TRAFFIC FLOW

This ecosystem uses a Hard Gate Funnel. No other routing structures are permitted.

Approved Traffic Paths Only

→ Instagram → Link in Bio → Fanvue

→ Instagram → Link in Bio → Free Telegram → Fanvue

→ Instagram → Link in Bio → Free Telegram → Link in Bio → Fanvue

How It Works

Instagram builds desire.
Telegram builds urgency.
Fanvue captures revenue.

FUNNEL ACTIVATION TIMING

DO NOT deploy funnel links immediately. Links must never be spammed in captions or comments.

Safe Activation Window

- Approximately 3 weeks of normal posting
- Stable engagement
- Green recommendation status

Once Activated, Links May Appear In

- Bio
- Story Highlights
- Story Link Stickers

This Prevents

- Shadowbans
- Recommendation suppression
- Early account flags

LINK IN BIO ARCHITECTURE

Your link in bio acts as a decision control hub. Fewer choices increase conversion probability. Do not overload the page.

Approved Platforms

- AllMyLinks
- Linktree
- Hoo.be

Mandatory Links Only

→ Fanvue (Primary Monetization)

→ Free Telegram (Pre-Sell Funnel)

Rule

Only two links. Nothing else. Fewer choices = higher conversion.

FREE TELEGRAM FUNNEL

Telegram exists to capture users who are interested but busy, in public or at work, or unwilling to enter payment details immediately.

Joining a free Telegram requires less commitment than subscribing to Fanvue. This makes Telegram the primary warming layer. Many users leave notifications ON, creating repeated exposure without Instagram risk.

TELEGRAM CONTENT RULES

Captions Must

- Express desire or urgency
- Imply availability
- Redirect to Fanvue

Posting Frequency

- Maximum 2-3 posts per day
- Overposting causes muting and exits

Content Guidelines

- Thirst traps
- Suggestive content
- More NSFW than Instagram
- NEVER more explicit than Fanvue

Critical Rule

Telegram content should increase frustration, not relieve it.

INSTAGRAM HIGHLIGHT FUNNEL

Highlights act as a permanent funnel entry.

Setup Rules

- One dedicated highlight only
- Sexier cover image than feed
- Face clearly visible

Inside the Highlight

- Story with Link Sticker
- CTA text: "Come chat to me" or "Talk to me here"
- Links may point to Fanvue or Telegram

FUNNEL AGGRESSION & COMPLIANCE

This funnel is designed to be aggressive. Aggression without structure leads to bans. Structure allows aggression to scale.

Aggressive Elements

- Frequent CTAs
- Repeated Fanvue exposure
- Emotional and sexual framing

Compliance Guardrails

- Instagram remains compliant
- Explicit payoff is exclusive to Fanvue
- Telegram bridges the gap

FUNNEL MISTAKES & COMMON FAILURES

Common Failures

- Too many links
- Fanvue buried or hidden
- No Telegram buffer
- Explicit previews on Instagram

Final Note

This funnel is not optional.
Traffic without structure is wasted.
Build desire. Delay commitment.
Force the decision at Fanvue.

SUMMARY

Key takeaways from this guide:

→ Instagram is a distribution engine, not a selling platform

→ The funnel removes emotion, guesswork, and impatience from monetization

→ Telegram sharpens demand for Fanvue — it does not replace it

→ The funnel lowers friction at every step to capture hesitant users

→ Links are placed only where they belong, only when the account is ready

→ Content escalates in the correct order: free, teasing, exclusive

→ When followed correctly, the funnel becomes self-sustaining

→ This is not a growth trick — it is a repeatable conversion system
