INTRO: WHY HIRING MATTERS

Chatters are the human layer of the system. They control communication, emotions, and revenue. A bad hire does not just reduce income. A bad hire can damage accounts, leak methods, or sabotage operations.

Hiring is not about finding cheap labor. It is about finding reliable operators who can follow structure and respect boundaries. You are not hiring personalities. You are hiring discipline.

Core Rule

Every chatter must be filtered. Every chatter must be tested. Every chatter must be proven before trust is given.

WHERE TO FIND CHATTERS

Primary Sources

- ofmjobs.com
- onlinejobs.ph

These platforms provide higher quality applicants who already understand online work and adult industry communication.

Secondary Sources

- Telegram
- Telegram groups such as ofmjobs on Telegram

Telegram is usable but lower quality. Many applicants there lack professionalism, discipline, or long term commitment.

Rule

The more public and unstructured the platform, the lower the average candidate quality. Always prioritize platforms where people apply formally.

FIRST SCREENING

Before any interview, applicants must be screened. This stage is about eliminating obvious bad fits before wasting time on interviews.

You Should Check

- Previous work history
- Basic English level from their written messages
- Their communication tone and professionalism

Filter Rule

If a candidate cannot write clearly, politely, and in full sentences, they should not move forward.

INTERVIEW PROCESS

Every candidate must go through a live interview. The interview is not just about answers. It is about behavior.

Interview Should Cover

- Previous chatting or sales work
- Experience with adult platforms if any
- Availability and time zone
- Motivation for the job

You Must Observe

- How they speak
- How confident they are in English
- How they respond under pressure
- How honest they seem about past work

Rejection Rule

Candidates who avoid direct answers or exaggerate experience should be rejected.

ENGLISH AND SKILL TESTING

After the interview, every candidate must be tested live. They must join a Discord call with screen sharing.

English Test

- Must answer questions verbally
- Must write sample replies in chat
- Prevents cheating with translators or AI tools

Typing Speed Test

- Words per minute test done live
- Shows how fast they can respond to fans

Rejection Rule

If a candidate refuses screen sharing or avoids live testing, they should be rejected immediately.

All materials are strictly protected under AI Influencer Accelerator® rights

OBSERVATION PERIOD

No candidate should get direct access after testing. They must first observe trained chatters for one to two days.

During This Period They Should

- Watch how real conversations look
- Understand tone and structure
- Learn pacing and discipline

This stage filters out people who lose interest quickly or cannot focus. Only candidates who stay attentive and engaged should move forward.

ACCESS CONTROL

Access must be earned gradually. New chatters should never receive full account access immediately. This reduces damage if a hire turns out to be malicious or incompetent.

→ First stage: Read only access, observation only

→ Second stage: Limited supervised chatting, no financial controls

→ Final stage: Full chatting access after trust is built

PAYMENT STRUCTURE

Standard Pay

- Hourly pay: $5-$7 per hour
- Commission: around 3% of profits
- Creates stability through hourly pay
- Creates motivation through commission

Payment Schedule

- Biweekly payments
- Preferred method: Wise

Payment Rules

- Clear payment rules must be set before work begins
- Never delay payments
- Never change pay terms without agreement

Trust Rule

A chatter who is paid on time is more loyal.
A chatter who is not paid becomes a risk.

PERFORMANCE TRACKING

Chatters Must Track (Excel)

- Hours worked
- Sales made
- Messages sent if required

Self reporting saves management time but requires verification to prevent manipulation.

Random Checks Confirm

- Chat activity
- Revenue numbers
- Time claims

You must regularly verify these stats to ensure they are accurate.

RISK AND TRUST MANAGEMENT

Chatters can cause serious damage if mistreated. They can leak methods, sabotage accounts, and spread negative reputation. Fear based management creates short term compliance but long term risk.

For This Reason

- Always treat chatters with respect
- Always pay them on time
- Always communicate clearly

Trust Principle

Trust is built through fairness, consistency, and transparency.
A well treated chatter protects your system.
A mistreated chatter becomes a threat.

SUMMARY

Key takeaways from this guide:

→ Chatters are operators — their performance directly affects profit and risk

→ Hiring correctly increases stability and revenue

→ Hiring poorly increases loss and exposure

→ Live interviews, live English testing, and controlled access are not optional

→ Most losses come from rushing hires, skipping tests, and trusting without verification

→ Payment must be on time — delayed pay creates risk

→ Structure separates scalable operations from chaos

→ Treat chatters with respect — they control your revenue
