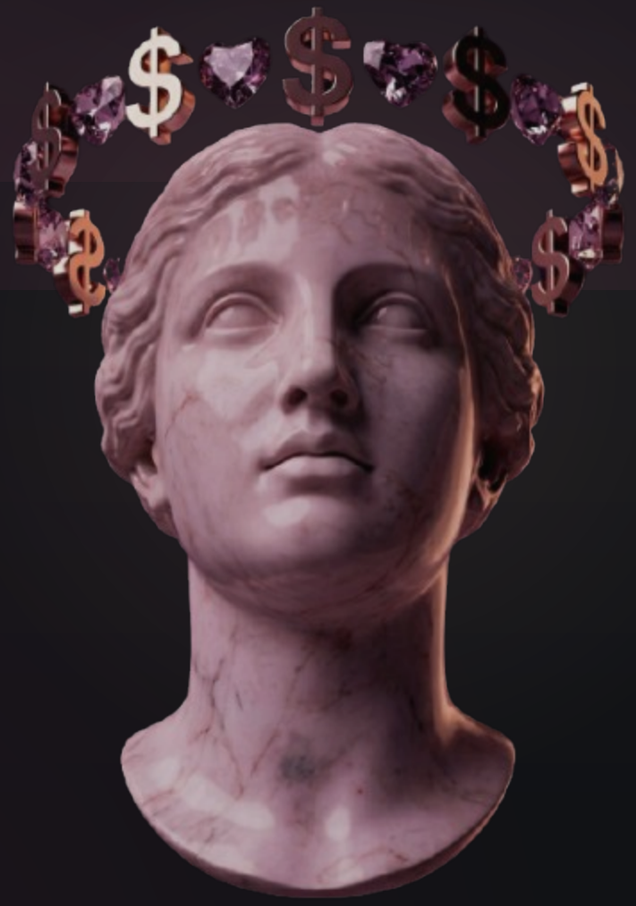
MODULE 6
LESSON 5

Twitter/X Growth Strategy

Grow Your Social Medias: Instagram, Threads, Reddit, Twitter

AI INFLUENCER METHOD



LESSON 5: TWITTER/X GROWTH STRATEGY

Twitter/X is a discovery platform, not a sales platform. It is built on replies, not posts. Your growth on Twitter comes from being seen in other people's conversations, not from broadcasting your own content. This is the opposite of Instagram.

Profile Setup

- Profile photo: best AI model face shot, high quality
- Banner: lifestyle or aesthetic image of your persona
- Bio: short, personality-driven, casual tone
- Pinned tweet: your best-performing or most engaging post
- No links in bio during warmup

Reply-Based Growth Engine

- Find popular accounts your target audience follows
- Reply to their tweets with witty, relevant, engaging takes
- Every reply is seen by that account's followers
- Goal: make people click on your profile from your reply
- Reply 10-20 times per day to build visibility

Target Audience

Twitter/X is strong for reaching affluent men aged 30-50+. This demographic spends more per subscriber than younger audiences. Target accounts and conversations that this audience follows.

Warmup (14 Days)

- Days 1-3: Scroll, like, retweet. No original posts.
- Days 4-7: Start replying to popular tweets. 5-10 replies/day.
- Days 8-10: First original posts. Mix of text and images.
- Days 11-14: Increase posting. Add images to tweets.
- After 14 days: Full posting schedule, add link in bio.

SHADOWBAN CHECK

Check your shadowban status regularly. If your replies stop getting likes, you may be shadowbanned. Reduce activity for 48 hours and resume slowly.
