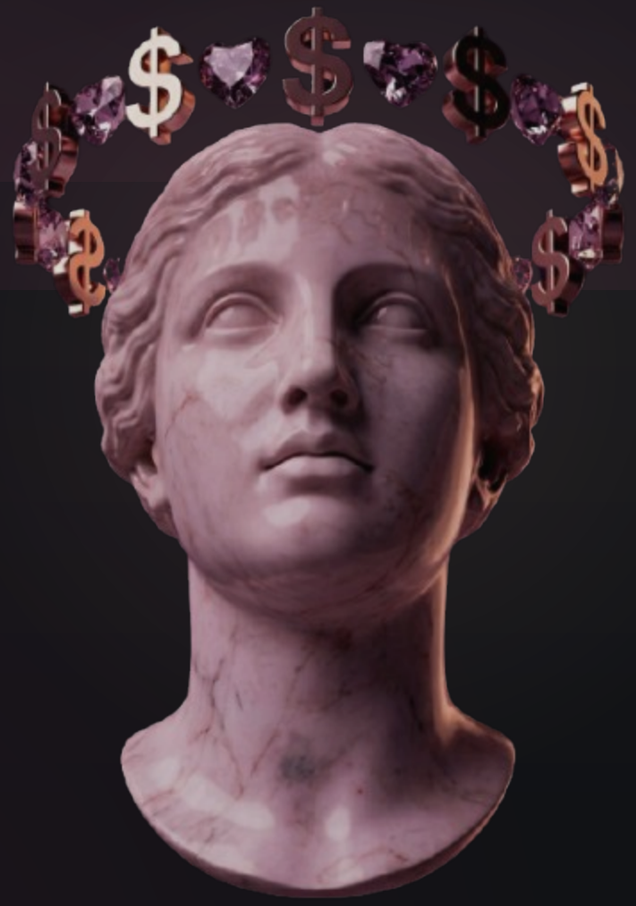
MODULE 6
LESSON 6

Cross-Platform Coordination

Grow Your Social Medias: Instagram, Threads, Reddit, Twitter

AI INFLUENCER METHOD



LESSON 6: CROSS-PLATFORM COORDINATION

You are not growing on five separate platforms. You are running one system with multiple tools. Each platform serves a role. Coordination between them is what multiplies your results.

Content Distribution Rules

- Instagram gets your best content FIRST — always
- Never post the same image on two platforms on the same day
- Threads content is text-only — don't duplicate Instagram captions
- TikTok recycles Instagram content (delayed by 2-3 days minimum)
- Reddit gets unique content tailored to each subreddit
- Twitter gets a mix of text posts and image tweets

Weekly Posting Schedule

- Instagram: 4-5 Reels + daily Stories + 2-3 carousels
- Threads: 3-8 text posts per day
- TikTok: 1-2 posts per day
- Reddit: 3-5 posts per week across subreddits
- Twitter: 2-3 tweets + 10-20 replies per day

Traffic Flow Between Platforms

- → Threads → drives profile visits to Instagram
- → Instagram → converts followers via link in bio
- → TikTok → supplements Instagram traffic
- → Reddit → niche viral spikes to profile
- → Twitter → steady discovery and brand presence
- → All platforms → Link in Bio → Telegram → Fanvue

COORDINATION RULE

Your persona must feel like the same person across all platforms. Same face, same name, same personality. The only thing that changes is the content format and tone for each platform.
