THE AI INFLUENCER *METHOD*

The Core Tool Stack

These are the only tools you need. Each one serves a specific function in the content pipeline. Keep it simple — do not overcomplicate your stack.

- Seedream 4.5 — AI image generation (NSFW content)
- Nano Banana 2 — AI image generation (SFW photorealistic output)
- Photopea — Export Instagram carousels to avoid AI filter (free)
- link.me — Link in bio funnel page (free)
- Telegram — Pre-sell warming channel (free)
- CapCut — Video editing (free)

> **HIGGSFIELD — ALL-IN-ONE OPTION**
>
> Higgsfield ($50/month) bundles AI image generation, video generation, and editing into a single platform. If you want one tool that does everything instead of juggling multiple services, this is the recommended option.

Primary Platforms

- Instagram — Main traffic and brand hub. This is your most important platform
- Threads — Engagement and discovery engine that feeds Instagram growth
- Telegram — Pre-sell funnel that warms followers before they subscribe
- Fanvue — Paid adult subscription platform for monetization

Support Platforms

- TikTok — Secondary reach and discovery (supplements Instagram)
- Reddit — Niche viral exposure inside specific communities
- Twitter/X — Brand presence and discovery through conversations

Reality Check

Results vary — you can start seeing results within weeks or months. Consistency is key. The operators making serious money have put in consistent daily work building their systems. This is not a get-rich-quick scheme, but those who stay consistent see real returns.

What You Do NOT Need to Start

- You do NOT need a $3,000 PC — cloud-based tools work for beginners
- You do NOT need multiple phones — start with one persona, one device
- You do NOT need a VPN — unnecessary and can trigger platform suspicion
- You do NOT need a team — solo operators can run one page profitably
- You do NOT need advanced video editing skills — simple clips outperform complex ones
