Course Overview and the Complete Basics to Starting AI Models

AI INFLUENCER METHOD

LESSON 1: THE AI INFLUENCER METHOD

The AI Influencer Method is a system for building and monetizing social media pages using AI-generated personas. These personas look, act, and engage like real influencers but are entirely created and managed through artificial intelligence tools. This is not about catfishing or deception. This is a business model. You are building a brand, not pretending to be a real person.

What You Will Learn

- How to create an AI influencer from scratch
- Which platforms to use and why
- How to grow from zero to monetization
- The exact content pipeline that works
- How to scale to multiple pages

Why AI Influencers Work

- No physical limitations on content output
- Consistent brand and persona across all content
- Scalable to multiple personas simultaneously
- Lower operating cost than real influencers
- Full creative control over every aspect

The Business Model

Attention flows through a funnel. Free content creates interest. Interest creates followers. Followers convert to paying subscribers.

- → Instagram / TikTok → Link in Bio
- → Link in Bio → Free Telegram
- → Free Telegram → Fanvue subscription
- → Fanvue chat → Upsells and PPV

Revenue Sources

- Fanvue / subscription platform monthly fees
- Pay-per-view (PPV) locked content
- Custom content requests via chat
- Tips and gifts from engaged fans

CRITICAL RULE

Revenue comes from the funnel, not from posting. Chat quality determines profit more than follower count.

MINDSET

This is a real business. The people who fail are the ones who skip steps, rush the process, or expect results without work. The window for early movers is open now.
