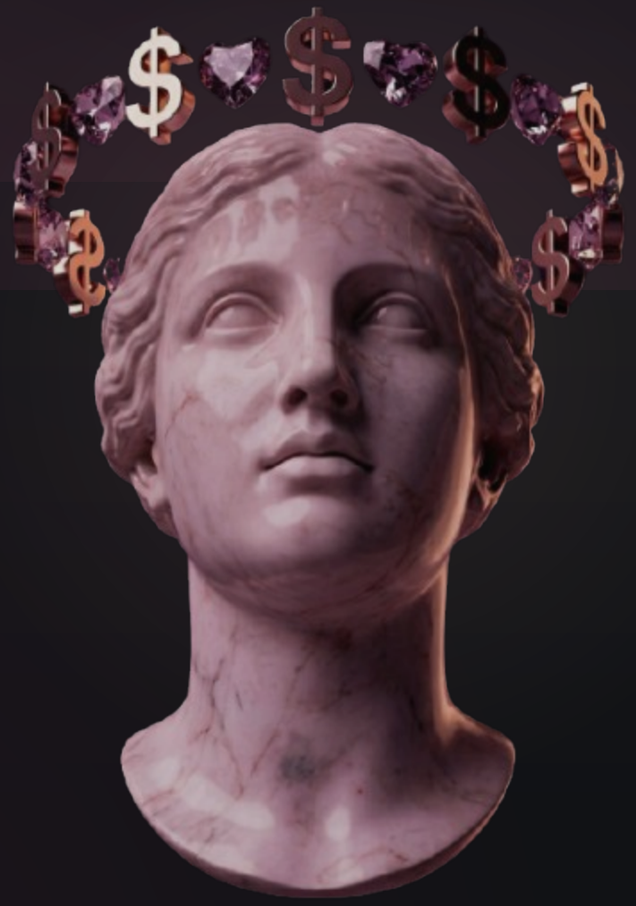
LESSON 4

TikTok Growth Strategy

Grow Your Social Medias: Instagram, Threads, Reddit, Twitter

AI INFLUENCER METHOD



LESSON 4: TIKTOK GROWTH STRATEGY

TikTok is a secondary traffic source. Instagram remains the main platform. TikTok converts worse than Instagram — estimated 5 to 10 times worse in CVR. Its value is extra reach when combined with other organic marketing.

Content Strategy

- Only post very safe content — TikTok moderation is stricter
- Carousel/photo format is the safest content type
- Recycle your best Instagram content (but not same day)
- Short video clips (3-10 seconds) with trending sounds
- Face-focused content outperforms everything else

Daily Behavior (Trust Signals)

- Scroll and watch content for 15-20 min/day
- Like and comment on other creators' posts
- Reply to comments on your own posts
- Post consistently: 1-2 posts per day
- Never use banned sounds or effects

What TikTok Rewards

- Accounts that look human and act slowly
- Content that stays within platform comfort zones
- Consistent posting schedule over time
- High watch time and completion rate on videos

Expected Results

If done correctly, TikTok should add approximately 20% more subscribers to your overall funnel. It is not the main driver. It is a supplement. Treat it as leverage, not focus.

SAFETY RULE

If content feels risky, do not post it on TikTok. Safe posting beats frequent posting. One strike on TikTok can shadow your account for weeks.
