LESSON 4

Multi-Account Scaling

Posting and Scaling on Your Social Media Accounts, the Trick Which Converts Viewers into Followers

AI INFLUENCER METHOD

LESSON 4: MULTI-ACCOUNT SCALING

Once your first page is profitable and stable, the system is ready to scale. Scaling means running multiple AI personas simultaneously. Each new persona multiplies your revenue potential — but only if done correctly. Sloppy scaling gets all your accounts banned.

When to Scale

- First page has consistent, reliable revenue
- Content pipeline is systematized and efficient
- You can produce content for a new persona without neglecting the first
- Chat operations are delegated or manageable
- You have the devices and infrastructure for another account

SCALING TRIGGER

Do NOT scale because you are bored with one page. Scale because one page is working and you have the capacity. Premature scaling kills both the old and new page.

Scaling Rules

- New persona = different niche, different look, different name
- Separate device for each persona (mandatory)
- Never link accounts to each other (no cross-follows, no shared links)
- Each persona gets its own email, phone number, and IP
- Max 2-3 accounts per device (TikTok: max 3 accounts)
- Stagger launches — don't start 3 new accounts in the same week

Infrastructure Checklist

- New phone or device (or browser profile)
- New SIM card or phone number
- New email address
- New VPN profile (different IP)
- Fresh content library (30+ images before launch)
