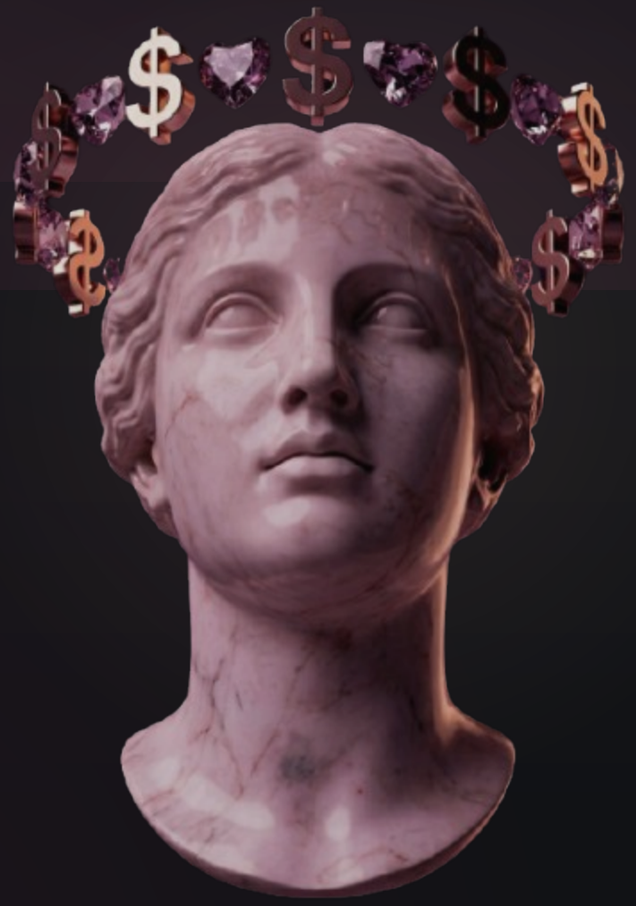
MODULE 9
LESSON 2

Link in Bio & Funnel Architecture

Learn How to Turn Social Media Followers into Paying Fans

AI INFLUENCER METHOD



LESSON 2: LINK IN BIO & FUNNEL ARCHITECTURE

The link in bio is the bridge between free attention and paid conversion. It acts as a decision control hub. Fewer choices increase conversion probability. Do not overload the page. Too many options = confusion = lost conversion. This lesson covers the exact architecture.

Link in Bio Setup

Approved Platforms

- AllMyLinks
- Linktree
- Hoo.be

Mandatory Links Only

- → Fanvue (Primary Monetization)
- → Free Telegram (Pre-Sell Funnel)

RULE

Only two links. Nothing else. Fewer choices = higher conversion. No Amazon wishlists, no Spotify, no personal blogs, no extra social links.

GOOD EXAMPLE:

Link page:
1. 'My free private channel' → Telegram
2. 'Exclusive content' → Fanvue
Clean, simple, two clear paths. Design matches persona aesthetic.

BAD EXAMPLE:

Link page:
8 different links, random colors, Amazon wishlist, Spotify, personal blog, Fanvue buried at the bottom.
Result: Fan gets confused, clicks nothing.

Free Telegram Funnel

Telegram exists to capture users who are interested but busy, in public or at work, or unwilling to enter payment details immediately. Joining a free Telegram requires less commitment than subscribing to Fanvue. This makes Telegram the primary warming layer. Many users leave notifications ON, creating repeated exposure without Instagram risk.

Telegram Content Rules

- Content must be more NSFW than Instagram but NEVER more explicit than Fanvue
- Thirst traps and suggestive content only
- Maximum 2-3 posts per day — overposting causes muting and exits
- Captions must express desire or urgency
- Captions must imply availability
- Captions must redirect to Fanvue with soft CTAs

CRITICAL RULE

Telegram content should increase frustration, not relieve it. If a fan can get satisfaction from Telegram, he will never subscribe to Fanvue.
