INTRO: THE ROLE OF TIKTOK

TikTok is a secondary traffic source. Instagram remains the main platform. TikTok converts worse than Instagram. Estimated 5 to 10 times worse in CVR. Its value is not volume.

TikTok Exists To

- Recycle content
- Generate extra views
- Capture additional attention

Its value is extra reach when combined with other organic marketing. TikTok should support the system. Not replace it.

Core Rule

TikTok is leverage. Not focus. Not dependency.

PLATFORM RISK: TIKTOK VS INSTAGRAM

TikTok is stricter than Instagram. Content moderation is heavier. Accounts are reviewed faster. Shadow limits happen more easily.

Because of this: only very safe content should be posted. TikTok is not the place to push boundaries. What works on Instagram can get limited on TikTok.

TikTok Rewards Accounts That

- Look human
- Act slowly
- Stay within platform comfort zones

Safety Rule

If content feels risky, do not post it on TikTok. Safe posting beats frequent posting.
