LESSON 2: CREATING & CONFIGURING ACCOUNTS

Account creation is not just signing up. Every decision you make in the first 24 hours sends signals to the platform's algorithm. This lesson covers how to create accounts that look human from the very first second.

Username Rules

- Human-sounding name — first name or first name + initial
- No random numbers (e.g., emma38472 is a red flag)
- No sexual or suggestive words anywhere in the username
- Easy to remember and search after seeing it once
- Same username across all platforms for this persona
- Check availability on Instagram, TikTok, Threads, and Twitter before committing

GOOD EXAMPLE:

Username: emma.laine / lilyy.rose / sofiamrr

Real-sounding, memorable, no red flags. Could be a real person's handle.

BAD EXAMPLE:

Username: hotgirl_2024 / xXsexyEmmaXx / model.promo.page

Instant red flags for platforms and audiences. Screams fake or promotional.

Email Setup

- Create a unique email for each persona (Gmail works fine)
- Email should match the persona name (e.g., emmalaine.personal@gmail.com)
- Never use the same email across multiple personas
- Enable 2FA on every account from day one — protects against account theft

Profile Setup (First 24 Hours)

- Add a profile photo (clear face shot of your AI model)
- Write a short, casual bio — personality-driven, not salesy
- No links in bio during warmup — add after 3+ weeks
- No selling language, no emoji spam, no hashtag stuffing
- Set account to public
- Do NOT add 'DM for collabs' or 'link below' type language

Bio Examples

GOOD EXAMPLE:

Bio: '22 dreaming in california'

Simple, human, personality-driven. Could be any real girl's bio.

BAD EXAMPLE:

Bio: 'DM for exclusive content. Link below.'

Screams promotional account. Will get flagged immediately.

Platform-Specific Account Creation

- Instagram: Create account, add photo and bio within first day, start engaging
- Threads: Linked to Instagram — set up after Instagram is created
- Twitter/X: Text-only posts first, no images for 3 days
- Reddit: Lurk mode for first 2 days — no posts, no comments

> **TIKTOK EXCEPTION**
>
> On TikTok, do NOT add username, bio, or profile picture immediately after account creation. Close the app for 20 minutes after creating the account. Then come back and add details slowly over the first 2-3 days. TikTok is the most sensitive to early behavior.

END SUMMARY

- One dedicated phone per persona — never share devices or IP addresses between personas
- Use residential or mobile proxies for best safety — datacenter VPNs are workable but riskier
- Antidetect browsers (GoLogin) and cloud phones (GeeLark) are for scaling beyond your first persona — not needed to start
- Usernames must be human-sounding, memorable, and consistent across all platforms
- No links, no selling language, and no suggestive content during warmup — period
- Instagram warmup: 21-28 days. TikTok: 9 days. Twitter/X: 14 days. No shortcuts exist
- Stay well below platform rate limits during warmup: under 50 likes/hour, under 10 follows/hour on Instagram
- Behave like a real person: scroll, like, comment naturally before posting content
- Most bans happen during warmup because people rush — patience is mandatory and non-negotiable
