MODULE 8: ACCOUNT SAFETY & PRECAUTIONS OVERVIEW

Learn How to Protect Your Social Media Accounts from Bans and What to Do if It Happens

What You'll Learn

- Lesson 1: Understanding Platform Bans & Shadowbans
- Lesson 2: Daily Safety Habits
- Lesson 3: What to Do If You Get Banned
- Lesson 4: Multi-Account Safety Rules

Key Takeaways

- Instagram's 2025 AI moderation shift permanently changed the landscape — prepare for flagging and have backups
- Shadowbans are invisible — monitor reach from non-followers daily to detect them early
- Prevention beats recovery: daily trust signals, safe content, and platform rate limits keep accounts healthy
- If shadowbanned: stop posting, go passive for 48-72 hours, resume at 50% frequency
- If permanently banned: start fresh with new device, new persona, new everything — rebuild smarter
- Device/IMEI bans affect ALL accounts on that phone — you may need a completely new device
- Always keep backup accounts warming up and content backed up locally and in the cloud
- Multi-account safety requires complete separation: device, IP, email, phone number — no exceptions
- If one account gets banned, quarantine all other accounts for 72 hours minimum
- Use appeal templates that are short, polite, and non-confrontational — never argue or threaten
