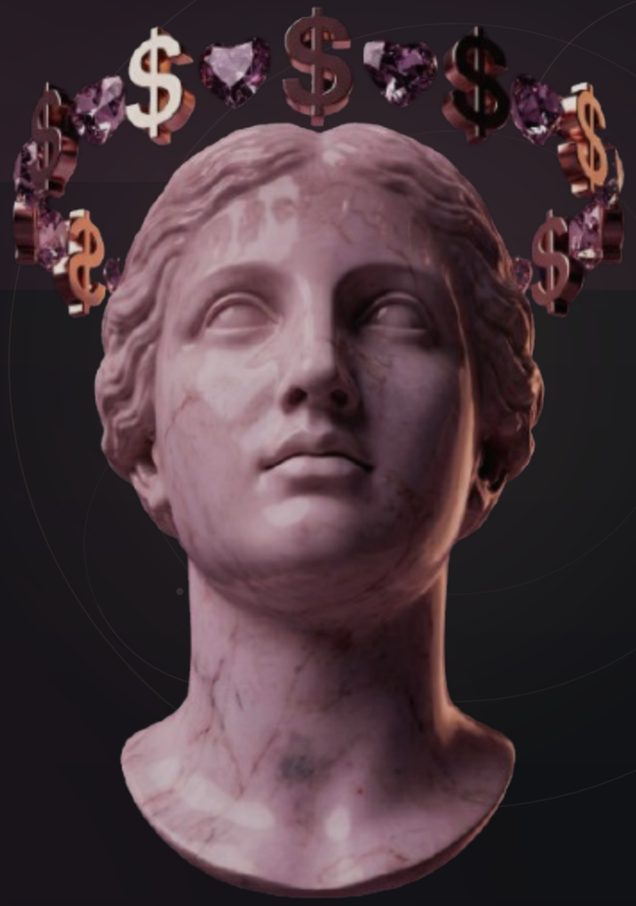
AI INFLUENCER METHOD | OUR DISCORD



LESSON 4: TIKTOK GROWTH STRATEGY

TikTok is a secondary traffic source. Instagram remains the main platform. TikTok converts worse than Instagram — estimated 5 to 10 times worse in CVR. Its value is not volume. Its value is extra reach when combined with other organic marketing. TikTok should support the system, not replace it.

TikTok Exists To

- Recycle content from Instagram
- Generate extra views and attention
- Capture additional audience that is not on Instagram
- Add approximately 20% more subscribers to overall funnel

What TikTok Rewards

- Accounts that look human and act slowly
- Content that stays within platform comfort zones
- Consistent posting schedule over time
- High watch time and completion rate on videos

> **SAFETY RULE**
>
> If content feels risky, do not post it on TikTok. Safe posting beats frequent posting. One strike on TikTok can shadow your account for weeks.

Platform Risk: TikTok vs Instagram

TikTok is stricter than Instagram. Content moderation is heavier. Accounts are reviewed faster. Shadow limits happen more easily. What works on Instagram can get limited on TikTok.

> **CORE RULE**
>
> TikTok is leverage. Not focus. Not dependency. Do not overinvest time. Instagram drives the system — TikTok supports it.

Account Setup: First Signals

New TikTok accounts must start empty. Early behavior determines trust. Follow this exactly.

Why Carousels Work

Carousels are the safest and often most effective content format on TikTok for AI personas. They avoid the AI detection risks of video while still getting strong algorithmic reach.

- Easy to consume — users swipe through naturally
- Significantly lower ban risk than video content
- Often get strong reach — TikTok's algorithm treats them favorably
- Best for new accounts and risk-averse posting
- Less chance of AI detection compared to AI-generated video
- Can be repurposed directly from your Instagram carousel content

Carousel Ideas

- Pictures of your model in different settings
- Your model with celebrities (AI composites)
- Your model in different outfits
- Your model in different moods

Posting Rules After Warmup

- Do not spam — wait 4+ hours between posts
- Do not batch upload multiple posts
- Do not post risky content
- Safe posting beats frequent posting
- 1-2 posts per day is the target

Scale Strategy

- Open up to 3 TikTok accounts
- All Instagram content can be reused across accounts
- Expected result: around 20% subscriber increase
- Do not overinvest time — TikTok supports, Instagram drives

END SUMMARY

- Instagram is the primary platform — Reels drive discovery, Stories drive engagement, never upload raw AI images
- Threads manufactures demand that feeds directly into Instagram — use validation bait and reply hijacking
- Reddit is a niche amplifier — 7-day warmup, karma farming, blend in before posting, always leave desire unfinished
- TikTok is secondary reach — 9-day warmup, only safe content, carousel format is safest, max 3 accounts per device
- Twitter/X grows through replies under big posts — target affluent men 40+, check shadowban status regularly
- Coordinate content across platforms — same persona, different formats, never same image same day
- Instagram always gets your best content first — all other platforms recycle with delays
- Every platform follows the content progression ladder: curiosity on social, desire building, Fanvue fulfillment
