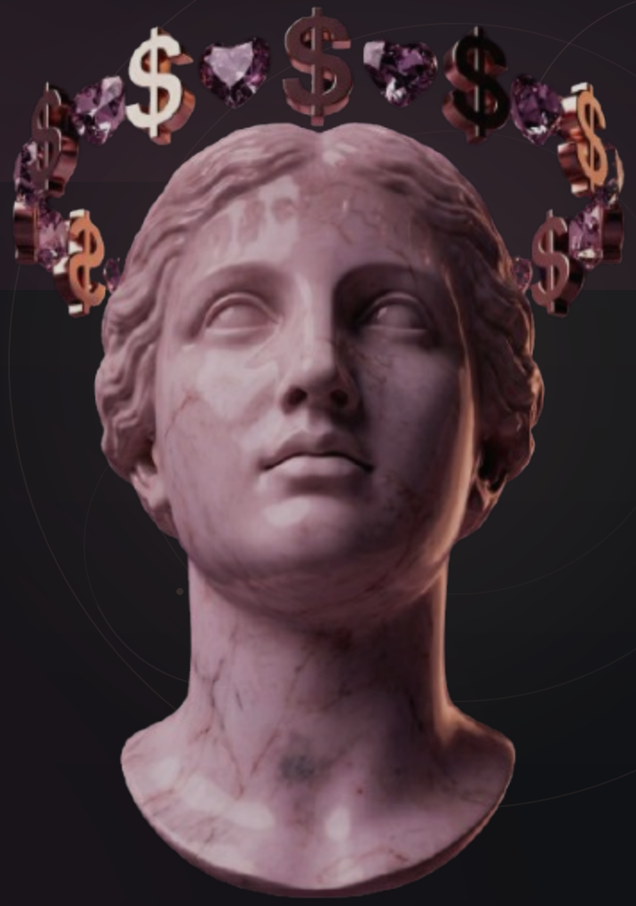
MODULE 8
LESSON 3

What to Do If You Get Banned

Learn the essentials of what to do if you get banned

AI INFLUENCER METHOD | OUR DISCORD



LESSON 3: WHAT TO DO IF YOU GET BANNED

Despite best practices, bans happen. They are part of operating in this space. What separates winners from quitters is how fast and smart you respond. This lesson covers exact steps for each scenario, including appeal templates you can use immediately.

If You Get Shadowbanned

- STOP posting immediately — do not try to 'post through it'
- Reduce all activity to passive scrolling only for 48-72 hours
- Remove any recently posted content that may have triggered it
- Check if you violated any content guidelines recently
- After 48-72 hours, resume posting slowly (50% of normal frequency)
- Monitor reach metrics daily — shadowbans typically lift in 7-14 days
- If reach does not recover after 14 days, the account may be permanently suppressed

If You Get Suspended

- Submit an appeal immediately through the platform's process
- Be polite, professional, and brief in your appeal
- Do not create a new account on the same device/IP while suspended
- Wait for the appeal — most platforms respond within 24-72 hours
- If first appeal fails, wait 30 days and try again with different wording

If You Get Permanently Banned

- Accept the loss — do not waste time on repeated appeals (one attempt is fine)
- Analyze what went wrong so you do not repeat the mistake
- Start fresh with a NEW persona (different look, name, niche)
- Use a completely new device, phone number, and IP address
- Do NOT try to recreate the same persona — platforms detect this
- Follow the warmup protocol from Module 5 with extra caution
- Your content library and systems still exist — rebuilding is faster than starting from zero

Device/IMEI Ban Recovery (Instagram)

Since 2025, Instagram can ban at the device level. This means every account on that phone is compromised. If you suspect a device ban:

- Do NOT create any new accounts on that device
- All existing accounts on that device should be considered at risk
- You need a completely new phone (factory reset alone may not work)
- New SIM, new IP, new email — everything must be fresh
- Consider using a cloud phone solution (GeeLark) to avoid future device bans

> **RECOVERY TIMELINE**
>
> Shadowban: 7-14 days of reduced activity, then gradual return.
> Temporary suspension: 24-72 hours for appeal response.
> Permanent ban: Full restart required — new device, new persona, 21-28 day warmup.
> Device ban: New phone required.

Appeal Template — Instagram

GOOD EXAMPLE:

Subject: Account Review Request

Hi Instagram team,

My account @[username] was recently restricted/suspended. I believe this may have been flagged in error. I always try to follow community guidelines and post appropriate content.

I would really appreciate it if you could review my account. I am happy to remove any content that may have caused an issue.

Thank you for your time.

Appeal Template — TikTok

GOOD EXAMPLE:

Hi TikTok team,

My account @[username] was restricted. I believe this was a mistake. I follow community guidelines and only post appropriate content. Could you please review my account?

Thank you.

APPEAL STRATEGY

Appeals should be short, polite, and non-confrontational. Never argue, never threaten, never mention other accounts. Sound like a confused normal user, not an angry marketer. This tone has the highest success rate.

The Rebuild Mindset

A ban is not the end. It is a setback. If your system works, you can rebuild. The knowledge, content pipeline, and processes you have built do not disappear because one account does. Experienced operators budget for account losses — they always have backup accounts warming up.

- Always have at least one backup account warming up on a separate device
- Keep your content library backed up locally and in the cloud
- Document your best-performing strategies so you can replicate them quickly
- Build your system to be account-independent — the system survives any single ban
- The operators making real money have been banned multiple times — they just rebuild faster each time

MINDSET

Getting banned is not a sign of failure. It is a sign that you are operating in a competitive space. The winners are the ones who prepare for bans, respond quickly, and rebuild smarter. The quitters are the ones who take it personally.

END SUMMARY

- Instagram's 2025 AI moderation shift permanently changed the landscape — prepare for flagging and have backups
- Shadowbans are invisible — monitor reach from non-followers daily to detect them early
- Prevention beats recovery: daily trust signals, safe content, and platform rate limits keep accounts healthy
- If shadowbanned: stop posting, go passive for 48-72 hours, resume at 50% frequency
- If permanently banned: start fresh with new device, new persona, new everything — rebuild smarter
- Device/IMEI bans affect ALL accounts on that phone — you may need a completely new device
- Always keep backup accounts warming up and content backed up locally and in the cloud
- Multi-account safety requires complete separation: device, IP, email, phone number — no exceptions
- If one account gets banned, quarantine all other accounts for 72 hours minimum
- Use appeal templates that are short, polite, and non-confrontational — never argue or threaten
