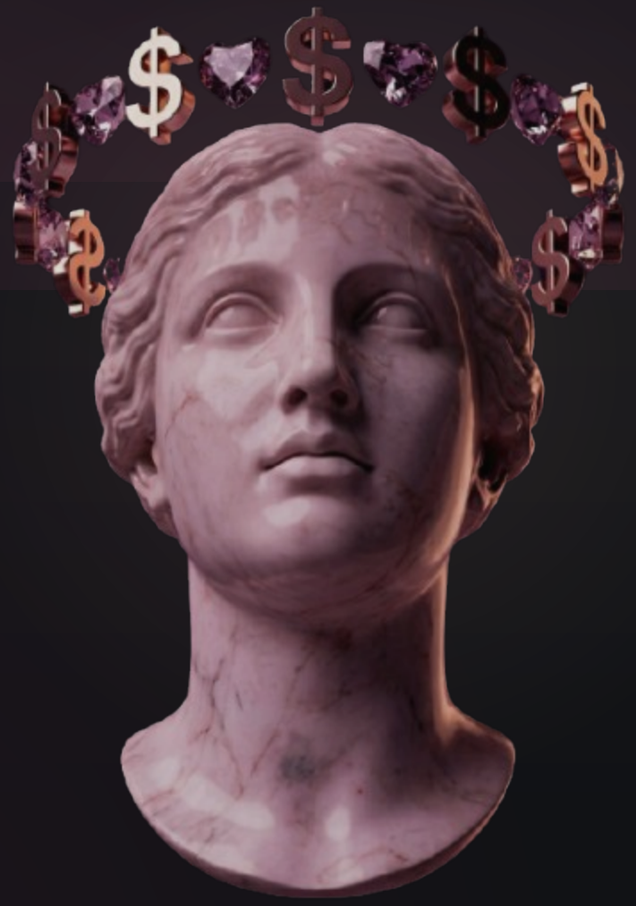
MODULE 6
LESSON 1

Instagram Growth Strategy

Grow Your Social Medias: Instagram, Threads, Reddit, Twitter

AI INFLUENCER METHOD



LESSON 1: INSTAGRAM GROWTH STRATEGY

Instagram is your primary traffic source. Everything else feeds into it or supports it. After warmup is complete (Module 5), you are ready to launch your real growth phase. This is where your page goes from looking human to actually growing.

Reels Launch Process

- Start Reels only AFTER warmup is fully complete
- First Reel should be simple: face-focused, trending audio, 5-10 seconds
- Post 3-5 Reels per week during the growth phase
- Use trending sounds — check the Reels audio library daily
- Keep captions short and personality-driven, not salesy

Content Hierarchy

- → Reels — Primary discovery tool (reach new people)
- → Stories — Daily engagement (keep existing followers active)
- → Carousels — Profile building (make your grid look real)
- → Feed posts — Support content (fills out your page)

Instagram Content Execution

- Instagram gets your BEST content first — always
- Never post the same image on Instagram and another platform same day
- Vary content: selfies, lifestyle, casual, glam — not all one type
- Stories should feel raw and 'in the moment' even if AI-generated
- Carousel posts: 3-5 images, first image is the hook

GROWTH TRIGGER

The algorithm pushes Reels when early engagement is strong. Post when your audience is online (check Insights). The first 30 minutes determine if the Reel gets distributed or dies.
