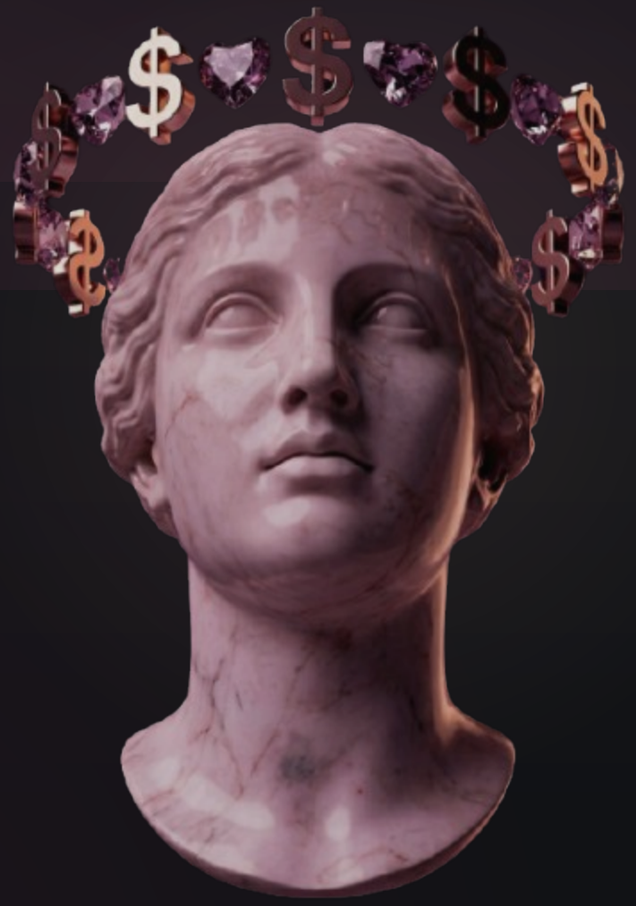
LESSON 6

Hiring & Managing Chatters

Learn How to Turn Social Media Followers into Paying Fans

AI INFLUENCER METHOD



LESSON 6: HIRING & MANAGING CHATTERS

As your page grows, you cannot chat with every fan yourself. Chatters are the people who manage conversations on your behalf, acting as your AI persona. Hiring the right chatters and managing them properly is the difference between scaling revenue and losing subscribers. A bad hire does not just reduce income. A bad hire can damage accounts, leak methods, or sabotage operations.

Hiring is not about finding cheap labor. It is about finding reliable operators who can follow structure and respect boundaries. You are not hiring personalities. You are hiring discipline.

CORE RULE

Every chatter must be filtered. Every chatter must be tested. Every chatter must be proven before trust is given.

Where to Find Chatters

Primary Sources

- ofmjobs.com — dedicated job board for this industry
- onlinejobs.ph — Filipino VA marketplace with strong English skills

These platforms provide higher quality applicants who already understand online work and adult industry communication.

Secondary Sources

- Telegram groups such as ofmjobs on Telegram
- Discord communities — industry-specific servers
- Referrals from other operators — best source of vetted talent

Telegram and Discord are usable but lower quality. Many applicants there lack professionalism, discipline, or long term commitment. Never hire friends or family — keep it professional.

SOURCE QUALITY RULE

The more public and unstructured the platform, the lower the average candidate quality. Always prioritize platforms where people apply formally.

First Screening

Before any interview, applicants must be screened. This stage eliminates obvious bad fits before wasting time on interviews.

- Check previous work history
- Assess basic English level from their written messages
- Evaluate communication tone and professionalism

FILTER RULE

If a candidate cannot write clearly, politely, and in full sentences, they should not move forward.

Interview Process

Every candidate must go through a live interview. The interview is not just about answers. It is about behavior.

Interview Should Cover

- Previous chatting or sales work experience
- Experience with adult platforms if any
- Availability and time zone
- Motivation for the job

You Must Observe

- How they speak and carry themselves
- How confident they are in English
- How they respond under pressure
- How honest they seem about past work

REJECTION RULE

Candidates who avoid direct answers or exaggerate experience should be rejected immediately.

English & Skill Testing
