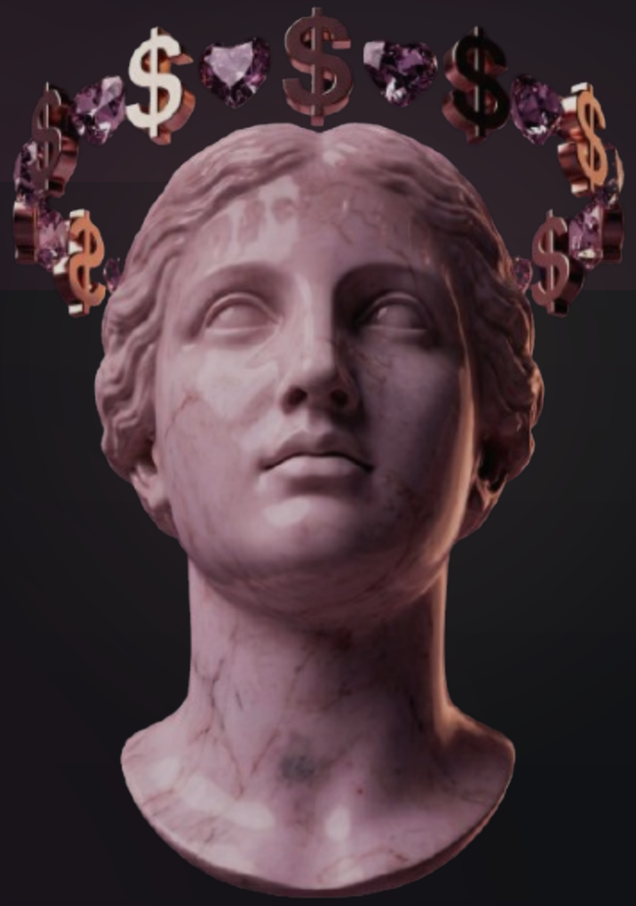
MODULE 8

Lesson 2
Daily Safety Habits

Protect Your Social Media Accounts from Bans and Recover if It Happens

AI INFLUENCER METHOD



LESSON 2: DAILY SAFETY HABITS

Prevention is infinitely easier than recovery. These daily habits keep your accounts healthy and your algorithmic trust high. Treat these as non-negotiable rules, not suggestions.

Daily Trust Signals

- Scroll your feed for 10-15 minutes before posting anything
- Like and comment on other creators' posts genuinely
- Reply to every comment on your own posts (engagement signal)
- Watch Stories and Reels from accounts you follow
- Keep follow/unfollow activity low — max 10-15 per day
- Post at consistent times each day

Content Safety Rules

- Never push content boundaries on Instagram or TikTok
- Keep swimwear/lingerie content to minimum on strict platforms
- No sexual captions, no suggestive language
- If unsure whether content is safe, don't post it
- Instagram is your revenue engine — protect it above everything

Technical Safety

- Never switch between accounts rapidly on the same device
- Log out of personal accounts before using persona accounts
- Keep VPN consistent — don't jump between locations
- Don't use third-party apps that require Instagram login
- Avoid automation tools that violate platform ToS
- Keep your phone's OS and apps updated

Metrics to Monitor Daily

- Reach from non-followers (should be steady or growing)
- Engagement rate per post (likes + comments / followers)
- Story views (should be 10-30% of follower count)
- Profile visits (should be steady or growing)
- Any warning notifications from the platform
