LESSON 3: THE WARMUP PROTOCOL

The warmup phase is the most important phase of your entire account lifecycle. It exists to teach the algorithm that your account is a real human. If you rush this, everything after breaks. There are no shortcuts. The platforms are watching your first 21 days more closely than any other period.

Duration: 21-28 days for Instagram/Threads. 9 days for TikTok. 14 days for Twitter/X. 7 days for Reddit. This phase is boring on purpose. Boring means safe.

Instagram Warmup (21-28 Days)

Week 1: Passive Engagement Only

- Scroll for 15-30 minutes daily
- Like posts from English-speaking creators (10-15 per session)
- Watch Reels and Stories naturally
- Follow 5-10 accounts per day maximum
- No posting, no comments yet

Week 2: Light Activity

- First carousel posts (2-3 per week)
- Face-focused, lifestyle, clean SFW content only
- Start Stories (2-3 per week) — selfies, food, daily life
- Comment occasionally on other posts (normal, human comments)
- No questions, no CTA, no suggestive captions

> **CRITICAL RULE**

END SUMMARY

- One dedicated phone per persona — never share devices or IP addresses between personas
- Use residential or mobile proxies for best safety — datacenter VPNs are workable but riskier
- Antidetect browsers (GoLogin) and cloud phones (GeeLark) are for scaling beyond your first persona — not needed to start
- Usernames must be human-sounding, memorable, and consistent across all platforms
- No links, no selling language, and no suggestive content during warmup — period
- Instagram warmup: 21-28 days. TikTok: 9 days. Twitter/X: 14 days. No shortcuts exist
- Stay well below platform rate limits during warmup: under 50 likes/hour, under 10 follows/hour on Instagram
- Behave like a real person: scroll, like, comment naturally before posting content
- Most bans happen during warmup because people rush — patience is mandatory and non-negotiable
