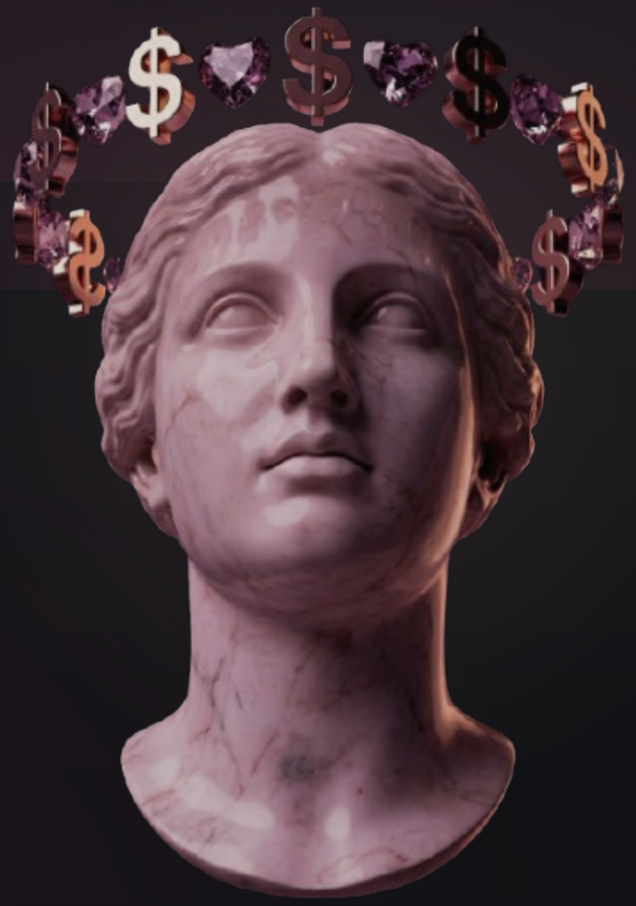
MODULE 8
LESSON 3

What to Do If You Get Banned

Learn How to Protect Your Social Media Accounts from Bans and What to Do if It Happens

AI INFLUENCER METHOD



LESSON 3: WHAT TO DO IF YOU GET BANNED

Despite best practices, bans happen. What separates winners from quitters is how fast and smart you respond. This lesson covers exact steps for each scenario.

If You Get Shadowbanned

- STOP posting immediately — do not try to 'post through it'
- Reduce all activity to passive scrolling only for 48-72 hours
- Remove any recently posted content that may have triggered it
- After 48-72 hours, resume posting slowly (50% of normal frequency)
- Monitor reach metrics daily — shadowbans typically lift in 7-14 days
- If reach does not recover after 14 days, the account may be permanently suppressed

If You Get Suspended

- Submit an appeal immediately through the platform's process
- Be polite, professional, and brief in your appeal
- Do not create a new account on the same device/IP while suspended
- Wait for the appeal — most platforms respond within 24-72 hours
- If first appeal fails, wait 30 days and try again with different wording

Appeal Template — Instagram

GOOD EXAMPLE:

Subject: Account Review Request

Hi Instagram team,

My account @[username] was recently restricted/suspended. I believe this may have been flagged in error. I always try to follow community guidelines and post appropriate content.

I would really appreciate it if you could review my account. I am happy to remove any content that may have caused an issue.

Thank you for your time.

Appeal Template — TikTok

GOOD EXAMPLE:

Hi TikTok team,

My account @[username] was restricted. I believe this was a mistake. I follow community guidelines and only post appropriate content. Could you please review my account?

Thank you.

APPEAL STRATEGY

Appeals should be short, polite, and non-confrontational. Never argue, never threaten, never mention other accounts. Sound like a confused normal user, not an angry marketer.

If You Get Permanently Banned

Do NOT accept a permanent ban without fighting it. Most permanent bans on Instagram are triggered by AI moderation — not a human reviewer. Your first step is always to appeal through the app. If that fails, you escalate to live support through Meta Verified.

- Step 1: Submit an appeal immediately through the Instagram app
- Step 2: If the in-app appeal is denied or ignored, move to the Meta Verified method below
- Step 3: Only after exhausting both options should you consider starting fresh

Meta Verified Appeal (Best Method)

This is the most effective way to recover a permanently banned Instagram account. You need to purchase Meta Verified on a Facebook account linked to your identity. Your Facebook profile picture must be your real face — this is required for the verification process. Once verified, you gain access to live support chat with an actual human at Meta.

GOOD EXAMPLE:

Hello, recently my account has gotten flagged by your AI moderation on Instagram and by the result of it I've gotten permanently banned on Instagram. I believe I have done nothing wrong and would like to request for a manual review. Thank you so much.

META VERIFIED STEPS

1. Create or use an existing Facebook account with your real face as the profile picture
2. Purchase Meta Verified on that Facebook account
3. Contact live support through the Meta Verified chat
4. Use the message template above — request a manual review
5. A human agent will review your case instead of the AI moderation system

Device/IMEI Ban Recovery (Instagram)

Since 2025, Instagram can ban at the device level. This means every account on that phone is compromised. If you suspect a device ban:

- Do NOT create any new accounts on that device
- All existing accounts on that device should be considered at risk
- You need a completely new phone (factory reset alone may not work)
- New SIM, new IP, new email — everything must be fresh
- Consider using a cloud phone solution (GeeLark) to avoid future device bans

RECOVERY TIMELINE

Shadowban: 7-14 days of reduced activity, then gradual return.
Temporary suspension: 24-72 hours for appeal response.
Permanent ban: Appeal first, then Meta Verified live support.
Device ban: New phone required.

If All Recovery Fails

Only after you have appealed through the app AND through Meta Verified live support should you consider starting fresh. If both methods fail, then rebuild with a new persona, new device, new phone number, and new IP address. Follow the warmup protocol from Module 5 with extra caution.

- Always have at least one backup account warming up on a separate device
- Keep your content library backed up locally and in the cloud
- Document your best-performing strategies so you can replicate them quickly
- Build your system to be account-independent — the system survives any single ban
