CHATTER HIRING SOP

Risk and Trust Management

Learn the essentials of risk and trust management

AI INFLUENCER METHOD | OUR DISCORD | SIGN UP TO FANVUE

Fanvue is the platform to start monetizing your AI models

RISK AND TRUST MANAGEMENT

Chatters can cause serious damage if mistreated. They can leak methods, sabotage accounts, and spread negative reputation. Fear based management creates short term compliance but long term risk.

For This Reason

- Always treat chatters with respect
- Always pay them on time
- Always communicate clearly

TRUST PRINCIPLE

Trust is built through fairness, consistency, and transparency.
A well treated chatter protects your system.
A mistreated chatter becomes a threat.

END SUMMARY

- Chatters are operators — their performance directly affects profit and risk
- Hiring correctly increases stability and revenue
- Hiring poorly increases loss and exposure
- Live interviews, live English testing, and controlled access are not optional
- Most losses come from rushing hires, skipping tests, and trusting without verification
- Payment must be on time — delayed pay creates risk
- Structure separates scalable operations from chaos
- Treat chatters with respect — they control your revenue
