INTRO: WHAT IS THE AI INFLUENCER METHOD

The AI Influencer Method is a system for building and monetizing social media pages using AI-generated personas. These personas look, act, and engage like real influencers but are entirely created and managed through artificial intelligence tools.

This is not about catfishing or deception. This is a business model. The audience knows they are interacting with a curated persona. The value they receive is entertainment, attention, and content.

- No physical limitations on content output
- Consistent brand and persona
- Scalable to multiple personas
- Lower operating cost
- Full creative control

Industry Growth

The AI influencer market is projected to grow significantly year over year. Early movers have the strongest advantage.

- Increase to 4-5 posts per week
- Start using Stories daily
- Begin Threads engagement
