MODULE 2: BASE MODEL CREATION OVERVIEW

Learn How to Generate Your Base Model Realistically and Efficiently

What You'll Learn

- Lesson 1: Choosing Your Niche & Persona
- Lesson 2: Generating Your Base Model
- Lesson 3: Face Consistency & Building Your Content Library

Key Takeaways

- Choose your niche based on market demand, not personal preference — girl-next-door and fitness niches have the highest proven demand
- Seedream 4.5 and Nano Banana 2 are your primary image generation tools — master both for different content types
- Your base model's face is your brand - keep it consistent
- Use the reference image method in Nano Banana 2 to maintain face consistency across all future SFW generations
- Always generate at least 3 versions of every image — Nano Banana 2 will produce inconsistent or unrealistic results, so pick only the best
- Lock in face structure, body type, skin tone, and eye color from day one — only outfits, lighting, and settings should vary
- Build a library of 30-50 images sorted into categories before launching any account
