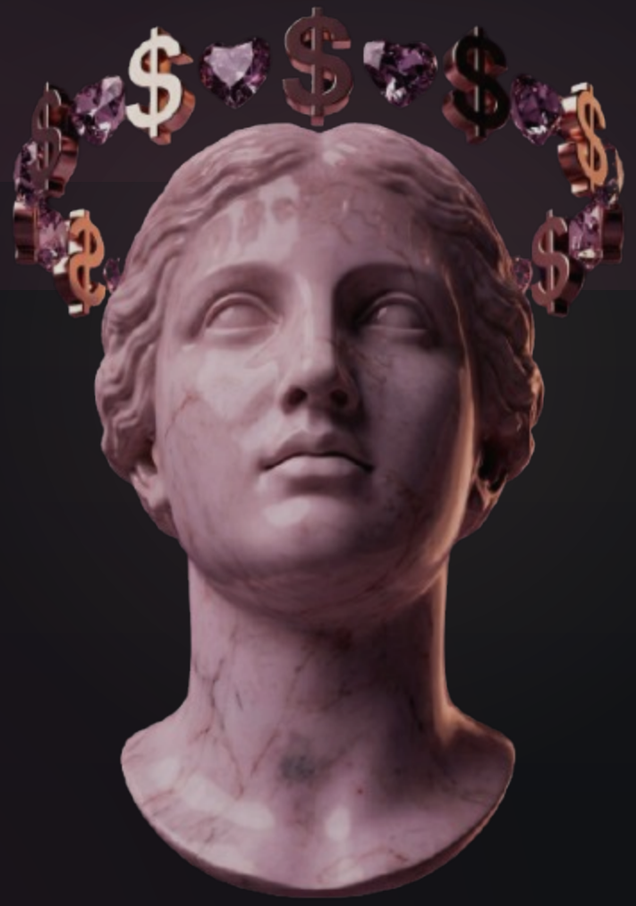
MODULE 2
LESSON 3

Consistency & Building Your Content Library

Learn How to Generate Your Base Model Realistically and Efficiently

AI INFLUENCER METHOD



LESSON 3: CONSISTENCY & BUILDING YOUR CONTENT LIBRARY

Consistency is what separates a believable AI influencer from an obvious fake. Your audience will scroll through your page. If the face changes between posts, trust is destroyed instantly. This lesson covers how to lock in your model's look so every image looks like the same person.

The Reference Image Method

Both Seedream 4.5 and Nano Banana 2 support reference image workflows. This means you upload your seed image as a reference, and the tool uses it to maintain your character's face across new generations. This is the primary method for achieving consistency.

How the Reference Method Works

- → Start with your locked-in seed image from Lesson 2
- → Upload it as a reference input when generating new images
- → Write a new prompt describing the desired scene, outfit, or setting
- → The tool preserves the face from your reference while creating the new scene
- → Generate multiple outputs and compare against the reference
- → Only keep images that match the face consistently

Face Swap as a Backup Method

If a generated image has a great body, pose, and setting but the face drifted slightly, face swapping can save it. This technique replaces the face in the generated image with your reference face.

- Generate the image with your desired scene and pose
- If the face drifts but the rest is good, use face swap to correct it
- Swap the face from your reference image onto the generated body
- Check that lighting and angle match naturally after the swap
- This is a correction tool, not your primary workflow — reference generation should be your default

Reference Image Best Practices

- Use a clear, front-facing headshot as your primary reference
- Keep 2-3 reference angles saved (front, 3/4 turn, profile) for variety
- Higher resolution reference images produce better consistency
- Never change your primary reference image once your page is live

Consistency Rules — What Must Stay Locked

- Face structure — jawline, cheekbones, nose shape, lip shape
- Body type and proportions
- Skin tone — must remain constant across all lighting
- Eye color — locked in from the start, never changes

All materials are strictly protected under AI Influencer Method® rights

- Adjust reference strength settings if the face drifts — higher strength means more consistency but less variety

IMAGE PLACEHOLDER

The reference workflow visualized: Seed Image uploaded → New prompt written → Tool generates new image with same face → Compare side by side → Approve or regenerate.

- Core hair color (natural changes like highlights are acceptable)

What Can Vary Naturally

- Lighting and shadows (indoor vs outdoor, golden hour vs studio)
- Clothing and outfits (expected and creates content variety)
- Background and location (home, outdoors, gym, cafe)
- Makeup style (subtle changes only — not dramatic transformations)
- Camera angle and distance (selfie vs full body vs portrait)
- Hair styling (up, down, braided — same base color)

IMAGE PLACEHOLDER

Side-by-side grid showing the same AI model across 4-6 different settings. Annotate: same face structure, same skin tone, same eye color, different outfit, different background. Use checkmarks on consistent elements.

VISUAL CONSISTENCY CHECK

Before posting any image, place it next to your last 3 posts. If the face does not look like the same person at a glance, do not post it. Regenerate until it matches. This 5-second test saves you from destroying trust with your audience.

All materials are strictly protected under AI Influencer Method® rights

You should never be scrambling for content. Before you post anything publicly, build a library of at least 30-50 images. This gives you a buffer and lets you plan your content calendar without pressure. Running out of content mid-warmup kills momentum and consistency.

Batch Generation Strategy

Dedicate specific sessions to content generation rather than creating images one at a time. A focused session with Seedream 4.5 and Nano Banana 2 should produce 10-20 usable images.

- Set aside 2-3 dedicated sessions per week for content generation
- Generate 10-20 images per session with varied prompts
- Use Seedream 4.5 for close-ups and portraits, Nano Banana 2 for full-body and lifestyle
- Change outfits, settings, and poses across the batch
- Sort images into categories immediately after generation
- Keep a 'rejected' folder — you may salvage these later with editing
- Target: build a 2-week content buffer before launching any account

Content Categories to Build

- Profile photos and headshots: 3-5 (your best face shots)
- Casual lifestyle shots: 10-15 (everyday settings, natural poses)
- Glamour or dressed-up shots: 5-10 (polished, curated content)
- Close-up selfie-style images: 5-10 (intimate, personal-feeling)
- Story-ready casual content: 10+ (raw, in-the-moment aesthetic)

Folder Structure

Organization saves time and prevents panic. Set up this folder structure before you start generating.

- /PersonaName/Reference/ — Your seed images and reference photos
- /PersonaName/Library/Headshots/ — Profile photos and close-ups
- /PersonaName/Library/Casual/ — Lifestyle and everyday content
- /PersonaName/Library/Glam/ — Dressed up and polished shots
- /PersonaName/Library/Stories/ — Casual, raw-feeling content for Stories
- /PersonaName/Rejected/ — Images that did not pass quality check
- /PersonaName/Posted/ — Archive of already-posted content

Prompt Templates for Each Category

Save these prompt templates and swap out the details for each generation. This ensures consistent quality while creating variety.

Screenshot of organized content library folder structure showing the categories above with example file counts in each folder.

GOOD EXAMPLE:

Headshot: 'Close-up portrait, natural light from window, soft smile, looking at camera, photorealistic, iPhone quality'

Casual: 'Sitting on couch in oversized hoodie, warm indoor lighting, relaxed pose, candid feel, photorealistic'

Glam: 'Black dress, mirror selfie, evening lighting, confident pose, photorealistic'

Gym: 'Workout outfit, gym mirror selfie, overhead fluorescent lighting, post-workout glow, candid'

Story: 'Taking selfie in car, natural daylight, casual expression, slightly messy hair, iPhone selfie style'

Grid of example content library showing variety across all 5 categories — headshots, casual, glam, selfie, stories. Show how the face remains consistent while settings and outfits vary.

MINIMUM BEFORE LAUNCH

Do NOT launch any social media account until you have at least 30 quality images saved and sorted across multiple categories. Running out of content mid-warmup kills momentum and consistency. Your content library is your business inventory — stock it before you open the store.
