MODULE 5: PHONE SETUP / WARMUP OVERVIEW

Social Media Setup for Your Phone and Warmup for Your Social Media Accounts

What You'll Learn

- Lesson 1: Phone & Device Setup
- Lesson 2: Creating & Configuring Accounts
- Lesson 3: The Warmup Protocol
- Lesson 4: Warmup Mistakes That Get You Banned

Key Takeaways

- One dedicated phone per persona — never share devices or IP addresses between personas
- Use residential or mobile proxies for best safety — datacenter VPNs are workable but riskier
- Antidetect browsers (GoLogin) and cloud phones (GeeLark) are for scaling beyond your first persona — not needed to start
- Usernames must be human-sounding, memorable, and consistent across all platforms
- No links, no selling language, and no suggestive content during warmup — period
- Instagram warmup: 21-28 days. TikTok: 9 days. Twitter/X: 14 days. No shortcuts exist
- Stay well below platform rate limits during warmup: under 50 likes/hour, under 10 follows/hour on Instagram
- Behave like a real person: scroll, like, comment naturally before posting content
- Most bans happen during warmup because people rush — patience is mandatory and non-negotiable
