INTRO: THE ROLE OF TIKTOK

TikTok is a secondary traffic source. Instagram remains the main platform. TikTok converts worse than Instagram. Estimated 5 to 10 times worse in CVR. Its value is not volume.

Its value is extra reach when combined with other organic marketing. TikTok should support the system. Not replace it.

> **CORE RULE**
>
> TikTok is leverage. Not focus. Not dependency.

TikTok Exists To

- Recycle content
- Generate extra views
- Capture additional attention

PLATFORM RISK: TIKTOK VS INSTAGRAM

TikTok is stricter than Instagram. Content moderation is heavier. Accounts are reviewed faster. Shadow limits happen more easily.

Because of this: only very safe content should be posted. TikTok is not the place to push boundaries. What works on Instagram can get limited on TikTok.

TikTok Rewards Accounts That

- Look human
- Act slowly
- Stay within platform comfort zones

> **SAFETY RULE**
>
> If content feels risky, do not post it on TikTok. Safe posting beats frequent posting.
