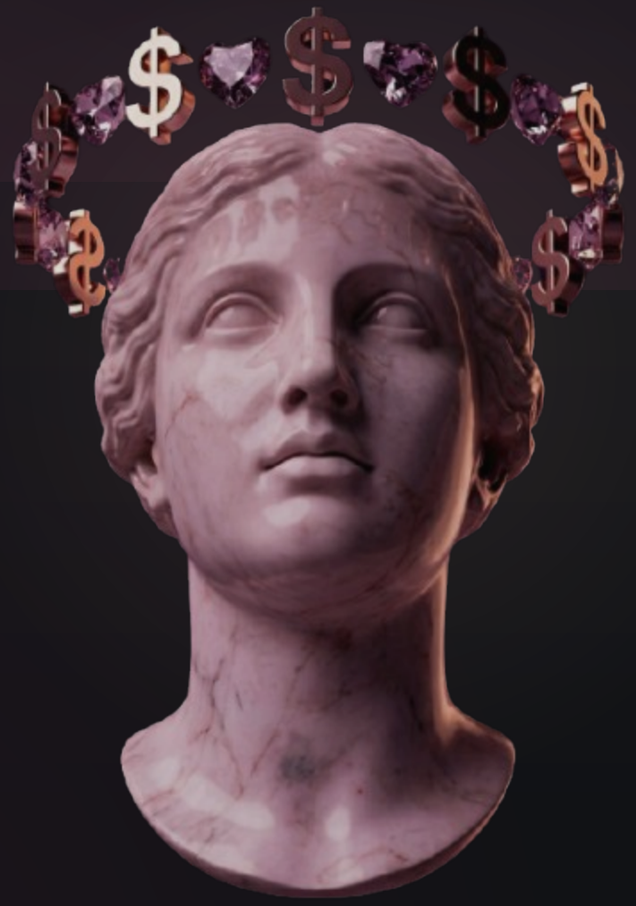
MODULE 9
LESSON 4

Pricing Strategy & Subscription Setup

Learn How to Turn Social Media Followers into Paying Fans

AI INFLUENCER METHOD



LESSON 4: PRICING STRATEGY & SUBSCRIPTION SETUP

Your subscription price is not designed to generate maximum profit on its own. Its main purpose is to remove fear and make the fan take the first step. The subscription price should feel like an easy decision — low enough to not trigger resistance, high enough to signal value. This lesson covers the pricing psychology and setup that maximizes conversions.

Subscription Pricing Psychology

- The subscription is a gateway, not the main revenue source
- Low price removes psychological resistance to the first payment
- High price signals value but kills conversion volume
- The sweet spot: $7-$15 per month base subscription
- Promotional pricing: visible discount to $3-$9 makes it feel like a deal
- Below $5 attracts low-quality subscribers who never engage
- Above $20 kills conversion volume for new pages

Pricing Tiers Strategy

- Base price: $10-$20 per month (creates perceived value)
- Promotional price: $3-$9 (visible discount that triggers action)
- Show the original price crossed out next to the promo price
- Limited-time framing increases urgency: 'Price going up soon'
- Never discount so heavily that you devalue your content — the promo price should feel like a deal, not charity

PRICING DATA

Industry data shows $7-$15/month is the sweet spot for AI influencer subscriptions. Below $5 attracts subscribers who never buy additional content. Above $20 dramatically reduces conversion rates for pages under 10K followers.

Page Setup Essentials

Your subscription page is where money is made. Everything else in this course leads to this page. First impressions matter — a poorly set up page loses subscribers within 24 hours.

Banner

- High-quality image of your AI persona in a natural, believable setting
- Casual and personal pose — not staged or over-produced
- Must match the mood of your persona (approachable, confident, playful)
- Should suggest lifestyle and personality, not just appearance

Bio

The bio should sound like a person, not a business. Personality creates desire. Features do not.

- First line: personality or mood — who you are
- Second line: type of content or interaction — what happens here
- Third line: emotional invitation — why they should stay

GOOD EXAMPLE:

Bio: 'Just a girl who loves late nights and sharing little moments. I post my daily life and things I usually keep private. Stay and get to know me.'

BAD EXAMPLE:

Bio: 'Daily posts. HD content. DM me.'

First Week of Content

- Have 5-10 posts ready before your first subscriber arrives
- Mix content types: lifestyle shots, casual selfies, personal updates
- Post consistently from Day 1 — empty pages cause immediate unsubscribes
- Captions should feel personal and conversational

RETENTION RULE

A subscriber who sees an empty or inconsistent page will unsubscribe immediately. Have content ready before launch. Post consistently. Respond to new subscribers quickly. The first 48 hours determine if they stay or leave.
