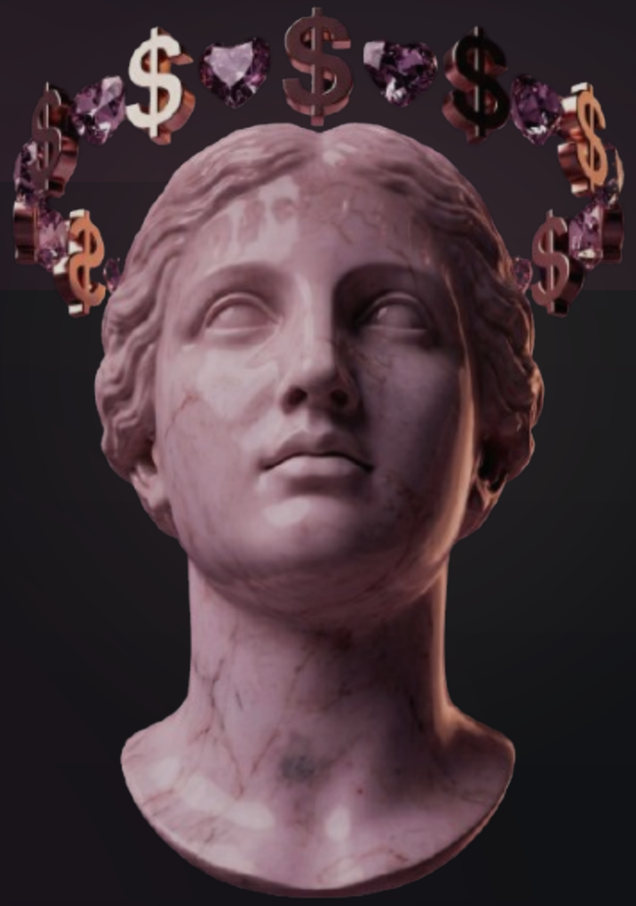
MODULE 2
LESSON 1

Choosing Your Niche & Persona

Learn How to Generate Your Base Model Realistically and Efficiently

AI INFLUENCER METHOD



LESSON 1: CHOOSING YOUR NICHE & PERSONA

Before you generate a single image, you need to decide who your AI model is. This is a business decision, not an aesthetic one. Your niche determines your audience, your content style, and ultimately your revenue potential. The biggest mistake beginners make is choosing a niche they personally like instead of one with proven market demand.

Research what is already working. Look at successful AI influencer pages on Instagram, Threads, and TikTok. Study what aesthetics get engagement, what niches have active audiences, and what styles people actually follow. You are building a product for a market, not creating art for yourself.

Key Persona Decisions

- Age range and look (18-25 is the standard sweet spot for engagement)
- Ethnicity and features — pick what resonates with your target audience
- Style and aesthetic (e.g., girl-next-door, alt, fitness, elegant, cute)
- Personality tone (shy, bold, playful, mysterious) — this shapes all captions
- Name — must sound real, be memorable, easy to search, and available across platforms

Proven Niche Categories

- Girl-next-door / College aesthetic — highest mass appeal, easiest to grow
- Fitness / Gym — strong engagement, clear content themes
- Alt / Goth — passionate niche audience, less competition
- Elegant / Luxury — attracts higher-spending audience
- Cute / Soft — strong on Threads and TikTok for discovery

Niche selection matrix: 2x2 grid showing Demand (High/Low) vs Competition (High/Low). Best niches labeled in high-demand quadrants. Example niches placed in each quadrant.

Niche Selection Rules

- Pick a niche with proven demand — do not invent a new one
- Research what is working on subscription platforms and social media
- Your persona must feel like a real person, not a character or cartoon
- Avoid overly specific niches that limit content variety
- Avoid niches that require complex backgrounds or scenarios to generate
- The simpler the niche, the easier it is to maintain consistency

GOOD EXAMPLE:

Niche: Cute, approachable college-age girl with a soft aesthetic.
Name: Emma, Lily, Sofia — simple, real, memorable.
Why it works: Massive audience, easy to generate content, natural settings.

BAD EXAMPLE:

Niche: 'Cyberpunk alien princess from the future.'
Name: XxDarkAngelxX — unnatural, forgettable.
Why it fails: Tiny audience, hard to generate consistently, looks obviously AI.

Name Selection Checklist

- Sounds like a real person's name — not a brand or character
- Easy to spell and remember after seeing it once
- Available as a username on Instagram, TikTok, and Threads
- Not already used by a well-known creator or public figure
- Works with a last initial for username format (e.g., emma.laine, sofiam)
