LESSON 4

Multi-Account Safety Rules

Learn How to Protect Your Social Media Accounts from Bans and What to Do if It Happens

AI INFLUENCER METHOD

LESSON 4: MULTI-ACCOUNT SAFETY RULES

Running multiple accounts is the highest-risk activity in this business. Platforms are designed to detect multi-account operations. One mistake can cascade and take down all your accounts simultaneously. These rules are absolute and non-negotiable.

All materials are strictly protected under AI Influencer Method® rights

Device Separation (Non-Negotiable)

- One phone per persona (ideal and safest)
- Max 2 accounts per device (absolute maximum — still risky)
- TikTok: max 3 accounts per device
- Never log into two personas in the same app session
- Never switch between accounts rapidly — wait 30+ minutes between logins
- Factory reset devices completely if reusing hardware for a new persona

IP & Network Separation

- Each persona should use a different IP address
- Use mobile data (different SIM) or separate VPN/proxy profiles
- Never access two personas from the same WiFi network at the same time
- Keep VPN locations consistent per persona — do not jump between cities
- Residential or mobile proxies are safest for multi-account operations
- Ensure timezone matches your IP geolocation (timezone mismatch is a detection signal)

Identity Separation

- Each persona gets a unique email address
- Each persona gets a unique phone number
- Never cross-follow between your own accounts
- Never share links between your own accounts
- Never mention one persona from another
- Different content niches, posting schedules, and caption styles

What Gets Multi-Accounts Caught

- Same IP address across accounts (most common cause)
- Same device fingerprint (IMEI, browser fingerprint, etc.)
- Cross-following between your own accounts
- Identical posting patterns (same times, same hashtags, same caption style)
- Shared link-in-bio URLs across accounts
- Logging into multiple accounts from one device in rapid succession
- Synchronized activity patterns (all accounts post at the same time daily)

NUCLEAR RULE

If one account gets banned, do NOT access your other accounts from the same device or IP for at least 72 hours. A ban investigation can cascade to linked accounts. Quarantine immediately. This is the single most important multi-account safety rule.

Proactive Account Health Monitoring

- Check Instagram Account Status (Settings → Account → Account Status) weekly
- Check Twitter/X shadowban status weekly using shadowban.yuzurisa.com
- Monitor reach metrics on all platforms daily — any sudden drop signals trouble
- Set calendar reminders for weekly health checks on all accounts
- Keep a log of any platform warnings or content removals per account
