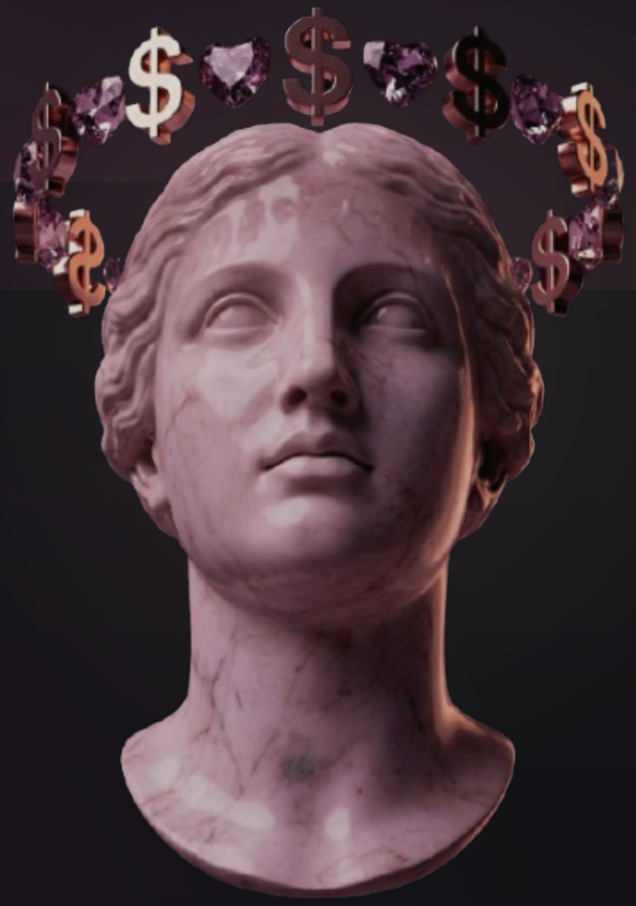
PREMIUM COURSE MATERIAL

Module 8
Account Safety & Precautions

Protect Your Social Media Accounts from Bans and Recover if It Happens

AI INFLUENCER METHOD



COURSE OUTLINE

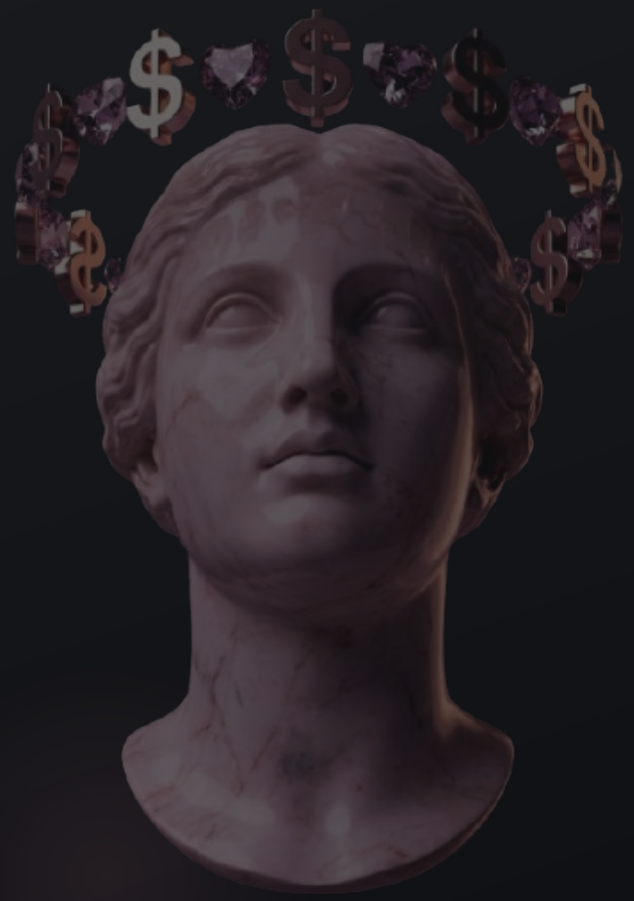
Table Of Contents

03 Lesson 1: Understanding Platform Bans & Shadowbans

04 Lesson 2: Daily Safety Habits

05 Lesson 3: What to Do If You Get Banned

06 Lesson 4: Multi-Account Safety Rules



All materials are strictly protected under AI Influencer Method® rights

LESSON 1: UNDERSTANDING PLATFORM BANS & SHADOWBANS

There are two types of bans: visible bans and invisible bans. Visible bans are when the platform tells you directly. Invisible bans (shadowbans) are far more dangerous because you will not know it happened until your growth flatlines. Understanding both is critical to protecting your accounts.

Types of Platform Actions

- Content removal — single post taken down (warning level)
- Temporary restriction — limited features for 24-72 hours
- Shadowban — content stops being shown to non-followers (invisible)
- Account suspension — temporary lockout requiring appeal
- Permanent ban — account deleted, usually not recoverable

What Triggers Flags

- Posting suggestive content too early (no trust built)
- Aggressive follow/unfollow behavior
- Spam-like posting patterns (too much, too fast)
- Link sharing during warmup phase
- Multiple accounts on same device/IP behaving identically
- Reports from other users

Shadowban Detection

A shadowban will NOT show a notification. Your content simply stops reaching new people. The only way to detect it is by monitoring your metrics.

- Instagram: Check Insights — if 'reach from non-followers' drops to near zero, you are likely shadowbanned
- TikTok: If views suddenly drop from thousands to double digits
- Twitter: Use shadowban checking tools to verify
- Reddit: If your posts get zero upvotes consistently in subreddits where they used to perform

WARNING

By the time you notice a shadowban, it has usually been active for days. Check your metrics daily. Early detection = faster recovery.

LESSON 2: DAILY SAFETY HABITS

Prevention is infinitely easier than recovery. These daily habits keep your accounts healthy and your algorithmic trust high. Treat these as non-negotiable rules, not suggestions.

Daily Trust Signals

- Scroll your feed for 10-15 minutes before posting anything
- Like and comment on other creators' posts genuinely
- Reply to every comment on your own posts (engagement signal)
- Watch Stories and Reels from accounts you follow
- Keep follow/unfollow activity low — max 10-15 per day
- Post at consistent times each day

Content Safety Rules

- Never push content boundaries on Instagram or TikTok
- Keep swimwear/lingerie content to minimum on strict platforms
- No sexual captions, no suggestive language
- If unsure whether content is safe, don't post it
- Instagram is your revenue engine — protect it above everything

Technical Safety

- Never switch between accounts rapidly on the same device
- Log out of personal accounts before using persona accounts
- Keep VPN consistent — don't jump between locations
- Don't use third-party apps that require Instagram login
- Avoid automation tools that violate platform ToS
- Keep your phone's OS and apps updated

Metrics to Monitor Daily

- Reach from non-followers (should be steady or growing)
- Engagement rate per post (likes + comments / followers)
- Story views (should be 10-30% of follower count)
- Profile visits (should be steady or growing)
- Any warning notifications from the platform

LESSON 3: WHAT TO DO IF YOU GET BANNED

Despite best practices, bans happen. They are part of operating in this space. What separates winners from quitters is how fast and smart you respond. This lesson covers exact steps for each scenario.

If You Get Shadowbanned

- STOP posting immediately — do not try to 'post through it'
- Reduce all activity to passive scrolling only for 48-72 hours
- Remove any recently posted content that may have triggered it
- Check if you violated any content guidelines recently
- After 48-72 hours, resume posting slowly (50% of normal frequency)
- Monitor reach metrics — shadowbans typically lift in 7-14 days

If You Get Suspended

- Submit an appeal immediately through the platform's process
- Be polite, professional, and brief in your appeal
- Do not create a new account on the same device/IP while suspended
- Wait for the appeal — most respond within 24-72 hours
- If appeal fails, wait 30 days and try again with new evidence

If You Get Permanently Banned

- Accept the loss — do not waste time on repeated appeals
- Analyze what went wrong so you do not repeat it
- Start fresh with a new persona (different look, name, niche)
- Use a completely new device, phone number, and IP address
- Do NOT try to recreate the same persona — platforms detect this
- Follow the warmup protocol from Module 5 with extra caution

RECOVERY TIMELINE

Shadowban: 7-14 days of reduced activity.
Temporary suspension: 24-72 hours for appeal.
Permanent ban: Start fresh — full warmup (21-28 days) on new device.

MINDSET

A ban is not the end. It is a setback. If your system works, you can rebuild. The knowledge and content pipeline you have built does not disappear because one account does. Rebuild smarter.

LESSON 4: MULTI-ACCOUNT SAFETY RULES

Running multiple accounts is the highest-risk activity in this business. Platforms are designed to detect multi-account operations. One mistake can cascade and take down all your accounts simultaneously. These rules are absolute.

Device Separation (Non-Negotiable)

- One phone per persona (ideal)
- Max 2 accounts per device (absolute maximum)
- TikTok: max 3 accounts per device
- Never log into two personas in the same app session
- Never switch between accounts rapidly
- Factory reset devices between personas if reusing hardware

IP & Network Separation

- Each persona should use a different IP address
- Use mobile data (different SIM) or separate VPN profiles
- Never access two personas from the same WiFi network simultaneously
- Keep VPN locations consistent per persona — don't jump around

Identity Separation

- Each persona gets a unique email address
- Each persona gets a unique phone number
- Never cross-follow between your own accounts
- Never share links between your own accounts
- Never mention one persona from another
- Different content niches and posting schedules

What Gets Multi-Accounts Caught

- Same IP address across accounts
- Same device fingerprint
- Cross-following between your own accounts
- Identical posting patterns (same times, same hashtags)
- Shared link in bio URLs
- Logging into multiple accounts from one device in rapid succession

NUCLEAR RULE

If one account gets banned, do NOT access your other accounts from the same device or IP for at least 72 hours. A ban investigation can cascade to linked accounts. Quarantine immediately.

END SUMMARY

- Shadowbans are invisible — monitor your reach metrics daily to detect them early
- Prevention beats recovery: daily trust signals and safe content keep accounts healthy
- If shadowbanned: stop posting, go passive for 48-72 hours, resume at 50% frequency
- If permanently banned: start fresh with new device, new persona, new everything
- Multi-account safety requires complete separation: device, IP, email, phone number
- If one account gets banned, quarantine all other accounts for 72 hours minimum
