Fanvue is the platform to start monetizing your AI models

GEO TARGETING & DISTRIBUTION CONTROL

Target

- English-speaking countries
- USA priority
- EU acceptable

Signaling

- USA city locations
- American music
- Flag emojis in moderation

Geo Blocking (LAST RESORT)

Geo blocking is not a default strategy. It is an emergency correction tool used when Instagram repeatedly pushes content to the wrong audience.

- Use Instagram native age restriction by country
- Go to Settings → Business Tools → Minimum Age
- Set highest age for countries to limit
- Do not use on brand-new accounts
- Continue posting USA-targeted content while active

END SUMMARY

- Threads manufactures demand first, then Instagram amplifies it
- The warmup phase (21-28 days) is mandatory and boring on purpose
- Threads posts should force comments, arguments, and profile visits
- Reels launch only after Threads proves engagement is stable
- Never upload raw AI images — always edit for realism
- Geo targeting prioritizes USA/English-speaking audiences
- Patience beats aggression — this strategy fails when you quit
- Treat every post as data — repeat what works, drop what does not
